This table summarizes the overall results for the local municipal residential land budget. The land budget examines the relationship between demand for additional housing units deriving from Schedule 7 forecast population growth and the municipality's available unit supply. The land supply analysis looks at housing units because this is the variable which requires land. Please refer to the Res-Detailed, Supply and Census Data sheets for more information on the inputs, assumptions and calculations underlying the analysis.	This is the number of additional permanent household residents that will need to be accommodated to meet the Schedule 7 forecast.	This is the number of additional housing units required to accommodate forecast population growth under Schedule 7 plus demand for seasonal and recreational units, not occupied by permanent residents.	This is the future housing unit potential based on currently approved units and additional unit potential through existing planning permissions.	This is the difference between the available unit supply and the anticipated unit demand.

ESSA: Residential Detailed

Table 1

1. How many units are needed?				2016		2031 Forecast	12	2016-31 Change

Notes

- 1. For some lower-tier municipalities in Simcoe County, the residential supply includes unit potential on Lands for Urban Uses and Lands Not for Urban Uses, per s.6.3.2.2. of the Growth Plan. These terms and the associated policies will no longer be in effect on July 1, 2017. Development potential on some lands may be somewhat over-estimated and require further refinement in the context of updated information that may be received. The County will continue to work with lower-tier municipalities to review and update the residential supply information in order to provide an appropriate basis for managing growth and land use planning in Simcoe County.
- 2. The residential land budget approach and results will be reviewed in the context of the Growth Plan, 2017 which comes into effect on July 1, 2017. At such time that the Province releases the forthcoming standard land needs assessment method, the County will also review the results and undertake any necessary updates to remain consistent with Provincial policy.

Note: PPUs by unit type are based on household units and household population from the 2011 Census. 2016 All Units PPUs are based on available information from initial 2016 Census data release. Forecast is based on one possible housing mix to achieve Schedule 7 of the Growth Plan in each municipality. The ultimate housing mix and other planning decisions may adjust the PPUs. Such changes, however, are likely to be minor.
