		2016-2031		Difference
Growth Plan Policy Area	Schedule 7 Population Growth	Demand Housing Units Needed	Supply Unit Potential	Potential Unit Surplus at 2031
Delineated Built Boundaries and Undelineated Built-Up Areas Designated Greenfield Areas Outside Settlement Areas Municipal-wide	2,131 3,588 - 5,718	1,044 1,567 - 2,611	793 6,784 - 7,577	(25 5,21 - 4,96
This table summarizes the overall results for the local municipal residential land budget. The land budget examines the relationship between demand for additional housing units deriving from Schedule 7 forecast population growth and the municipality's available unit supply. The land supply analysis looks at housing units because this is the variable which requires land. Please refer to the Res-Detailed, Supply and Census Data sheets for more information on the inputs, assumptions and calculations underlying the analysis.	This is the number of additional permanent household residents that will need to be accommodated to meet the Schedule 7 forecast.	This is the number of additional housing units required to accommodate forecast population growth under Schedule 7 plus demand for seasonal and recreational units, not occupied by permanent residents.	This is the future housing unit potential based on currently approved units and additional unit potential through existing planning permissions.	This is the difference between the available unit supply and the anticipated unit demand.

MIDLAND: Residential Detailed

Table 1

. How many units are needed?				2016		2031 Forecast	2016-31 Change
	A. Population Components						
		Total Population		17,388		22,500	5,11
		Census Net Undercoverage	Rate	3.0%	\rightarrow	3.0%

RESIDENTIAL SUPPLY DATA CURRENT AS OF DECEMBER 2016

PLEASE NOTE:

This report is intended to be read in conjunction with the Simcoe County Land **Budget Data Collection and Analysis** Phase 1: Population Growth document.

2. Where will these units be			2016-31 Change			
accommodated?	A. Demand by Growth Plan policy	Unit Growth 2016-2031				
	area		40%			
		Local Municipal Intensification Target (1)				
		Additional share of growth accommodated within Built Boundaries and/or within the Undelineated Built-Up Area (2)	<u>0%</u> 40%			
		Overall share of growth within Built Boundaries and Undelineated Built-Up Areas (3)	40%			
		Note: The County Official Plan identifies local intensification targets for each municipality (1). This figure only represents the <i>minimum</i> number of units to be built within delineated built boundaries plus the undelineated built-up areas (3) . In the four municipalities with <i>no</i> undelineated built-up area, the County Official Plan local intensification target represents units to be built within the delineated built boundary . Where an additional share of growth can be accommodated within delineated built boundaries plus the undelineated built-up areas (2) , the associated units may also be counted towards achievement of the County-wide intensification target in addition to the Official Plan local minimum target.				
		Unit growth within delineated Built Boundaries and undelineated Built-Up Areas				
		Share of Growth in Designated Greenfield Areas Unit Growth in Designated Greenfield Areas				
			1,567			
		Share of Growth Outside Settlement Areas	0%			
		Unit Growth Outside Settlement Areas	-			
		Total All <i>Growth Plan</i> Policy Areas	2,611			
		Percent	100%

3. Is there sufficient supply within delineated built boundaries & A. Demand undelineated built-up areas?		Unit Growth 2016-2031 inside delineated built boundaries & undelineated built-up areas			
		Units completed Census day 2016 to December 31, 2016 Registered and Draft Approved units Complete Applications units	47 121 0		
		Forecast of unit potential on vacant lands inside delineated built boundary Forecast of unit potential on vacant lands for urban uses inside undelineated built up areas Forecast of unit potential on vacant lands not for urban uses inside undelineated built up areas	625 0 <u>0</u>		
		Total supply	793		
	C. Sufficiency of Supply	Excess Supply at 2031 (or shortfall at 2031) Positive figure means more than enough supply, negative means a supply shortfall.	(251)		
	D. Response	If there is a surplus, the analysis has demonstrated that there is sufficient unit potential inside delineated built boundaires & undelineated built up areas to meet the intensi there is a deficit, the County or local municipality should identify additional supply inside delineated built boundaries and undelineated built up areas of the subject municipality intensification target.			
Table 4					
4. What is the status of the land supply outside settlement areas?	A. Demand	Unit Growth 2016-2031 outside settlement areas	0		
	B. Supply outside settlement areas	Units completed Census day 2016 to December 31, 2016 Registered and Draft Approved Complete Applications Forecast of unit potential on vacant lands Total supply outside settlement areas	0 0 0 0 0		
	C. Sufficiency of Supply	Excess Supply at 2031 (or shortfall at 2031) Positive figure means more than enough supply, negative means a supply shortfall.	0		
	D. Response	If there is a surplus, the analysis has demonstrated that there is sufficient unit potential, and associated land supply, to meet anticipated demand. If there is a deficit, either municipality can assume that new rural applications or existing lots of record will be sufficient to meet the deficit or the assigned demand share (in 2 a) can be lowered. The a policy decision within the context of rural development policies in the County and local plans.	•		

_	_			_
7		h	Δ١	ς.

5. Is there sufficient unit supply in the designated greenfield areas?	A. Demand	Total unit Growth 2016-2031 in the Designated Greenfield Area (DGA)				
			Single/Semi	Row	Apt.	Total
		Assumed housing mix by type	95.0%		5.0%	
		Housing growth by type	1,488	0	78	1,567
	B. Supply in Designated Greenfield					
	Areas (DGA)	Units completed Census day 2016 to December 31, 2015	42	1	0	43
		Registered and Draft Approved	317	1,479	491	2,287
		Complete Applications	0	0	55	55
		Forecast of unit potential on vacant DGA lands for urban uses	4,399	0	0	4,399
		Forecast of unit potential on Vacant DGA lands not for urban uses	C	0	0	0
		DGA Supply excluding lands not for urban uses	4,758	1,480	546	6,784
		DGA Supply including lands not for urban uses	4,758	•	546	6,784
	C. Sufficiency of Supply	Excess/Shortfall of supply at 2031 on DGA lands for urban uses Excess/Shortfall of Supply at 2031 on all DGA lands Positive figure means more than enough supply, negative means a supply shortfall.	3,270 3,270	-	468 468	
	D. Response	If there is a surplus in all unit types on Lands For Urban Uses, the analysis has demonstrated that there is sufficient unit potential, and associated land supply, identified in Design Greenfield Lands For Urban Uses to meet the forecast demand. If there is a unit shortfall on Designated Greenfield Lands for Urban Uses, in one or more unit type categories, the local municipality should consider adjusting the assumed unit mix of either or both of the supply and demand, where reasonable, to provide a better match between supply and type. This reallocation on either the supply or demand side is more readily achieved in Designated Greenfield areas through ground-based unit types (e.g. singles, semis and row readily achieved for apartments. If the shortfall persists after reasonable adjustments are made, additional Designated Greenfield Lands For Urban Uses may be needed to according to the shortfall persists after reasonable adjustments are made, additional Designated Greenfield Lands For Urban Uses may be needed to according to the shortfall persists after reasonable adjustments are made, additional Designated Greenfield Lands For Urban Uses may be needed to according to the supply of the shortfall persists after reasonable adjustments are made, additional Designated Greenfield Lands For Urban Uses may be needed to according to the supply of the shortfall persists after reasonable adjustments are made, additional Designated Greenfield Lands For Urban Uses may be needed to according to the supply of the shortfall persists after reasonable adjustments are made, additional Designated Greenfield Lands For Urban Uses may be needed to according to the supply of t				es, the County or and demand by unit rows) and not

	Demand	Total Supply	7,577		17,154
		Surplus or (Deficit)	4,966		11,436
	E. Response				
		A positive figure in the last line of Section C, Designated Greenfield Area <i>Lands for Urban Uses</i> , indicates the accomodate the Schedule 7 population forecasts. A negative figure in the last line of Section C, Designated G supply to accommodate the Schedule 7 population forecasts. As a result, additional residential land supply m	ireenfield Area <i>Lands for Urban Uses</i> , inc	licates that there is insu	ufficient DGA land

Notes

- 1. For some lower-tier municipalities in Simcoe County, the residential supply includes unit potential on Lands for Urban Uses and Lands Not for Urban Uses, per s.6.3.2.2. of the Growth Plan. These terms and the associated policies will no longer be in effect on July 1, 2017. Development potential on some lands may be somewhat over-estimated and require further refinement in the context of updated information that may be received. The County will continue to work with lower-tier municipalities to review and update the residential supply information in order to provide an appropriate basis for managing growth and land use planning in Simcoe County.
- 2. The residential land budget approach and results will be reviewed in the context of the Growth Plan, 2017 which comes into effect on July 1, 2017. At such time that the Province releases the forthcoming standard land needs assessment method, the County will also review the results and undertake any necessary updates to remain consistent with Provincial policy.

Note: PPUs by unit type are based on household units and household population from the 2011 Census. 2016 All Units PPUs are based on available information from initial 2016 Census data release. Forecast is based on one possible housing mix to achieve Schedule 7 of the Growth Plan in each municipality. The ultimate housing mix and other planning decisions may adjust the PPUs. Such changes, however, are likely to be minor.
