Purpose

Children make up a significant part of the population in Simcoe County. Understanding the distribution and composition of children across Simcoe County is important to providing services and programming. The purpose of this report is to provide information and data to the County of Simcoe's Children and Community Services Department, to help facilitate the creation of a helpful and evidence-based childcare service plan. This service plan will then be presented to County Council.

This report will show the demographics and family characteristics of children, primarily focusing on children, aged 0 to 6 years, living in Simcoe County.

Methodology

The information used in this report was gathered from the 2016 Census. The 2016 Census is the most recent detailed enumeration of Canadian residents. The 2016 Census' response rate was 97.4%, making it one of the most accurate Census data. Information was also gathered from the 2011 and 2006 Census in order to calculate changes for certain variables in the report.

Notes:

Children in this report refer to the **population aged 0 to 5 years** (Table 6), **0 to 6 years** (Figure 1, 2, 3 and 4, Table 1, 2 and 5), and **0 to 14 years old** (Table 3, 4 and 7). Some data was provided for the age groups 0 to 5 and 0 to 14 years, because the data was not available for the age group 0 to 6 years.

Population in private household: unless otherwise specified, all data in census products are for private households only.

Random rounding and percentage distributions: To ensure the confidentiality of responses collected for the 2016 Census, a random rounding process is used to alter the values reported in individual cells. As a result, when these data are summed or grouped, the total value may not match the sum of the individual values, since the total and subtotals are independently rounded. Similarly, percentage distributions, which are calculated on rounded data, may not necessarily add up to 100%.

Due to random rounding, counts and percentages may vary slightly between different census products, such as the analytical documents, highlight tables and data tables.

Aboriginal identity, and **Francophone** data may still be slightly underrepresented due to unevenly distributed response rates among municipalities.

The **glossary** of principal terms are available on [page 19](#). For details on the concepts, definitions, and variables used in the 2016 Census of Population, please consult the [Dictionary, Census of Population, 2016](#).

Key Points

- According to the 2016 Census, Simcoe County had 35,100 children, aged 0 to 6 years, making up 7.5% of the total population. From 2011 to 2016, the population of children, aged 0 to 6 years, in Simcoe County, grew by 5.9% (1,955).
- In 2016, in Simcoe County, 470 children under the age of 7, were first generation and 6,945 children were second generation. Together, these first and second generation children (7,415) represented 21.1% of the total 0-6-year-old population of children in Simcoe County.
- In 2016, in Simcoe County, 6.2% (2,190) of the 0-6-year-old population, identified as Aboriginal. In Simcoe County, the number of Aboriginal children, aged 0 to 14 years, grew by 94.3%, from 2,610 in 2006 to 5,070 in 2016.
- In 2016, in Simcoe County, 99.1% (34,790) of the population, aged 0 to 6 years, could speak either English or French, or both.
- In 2016, in Simcoe County, 1,985 children, aged 0 to 14 years, identified as being Francophone, representing 2.5% of the total 0-14-year-old population in Simcoe County.
- The top 5 most common mother tongue languages in Simcoe County, amongst children, aged 0 to 6 years, for 2016, were Spanish, Russian, Mandarin, Urdu, and Polish.
- In 2015, in Simcoe County, there were 5,615 children, aged 0 to 6 years, living in low income, accounting for a prevalence of 16.1% low income.
- Simcoe County experienced an increase of 42.4% in the number of children, aged 0 to 5 years, with a low income status from 2005 (3,310) to 2015 (4,715). The prevalence of low income increased by 3.9% from 2005 (12.1%) to 2015 (16.0%).
- In 2016, in Simcoe County, 16,070 children, aged 0 to 14 years, were living in a lone parent census family, representing 20.4% of the total population of 0-14-year-old children in Simcoe County, which increased by 7.6% since 2011.
- In 2016, in Simcoe County, 400 children, aged 0 to 14 years, were living with one or two grandparents, without parents present, representing 0.5% of the total population of 0-14-year-old children in Simcoe County, which increased by 12.7% since 2011.

The Population of Children, Aged 0 to 6 Years

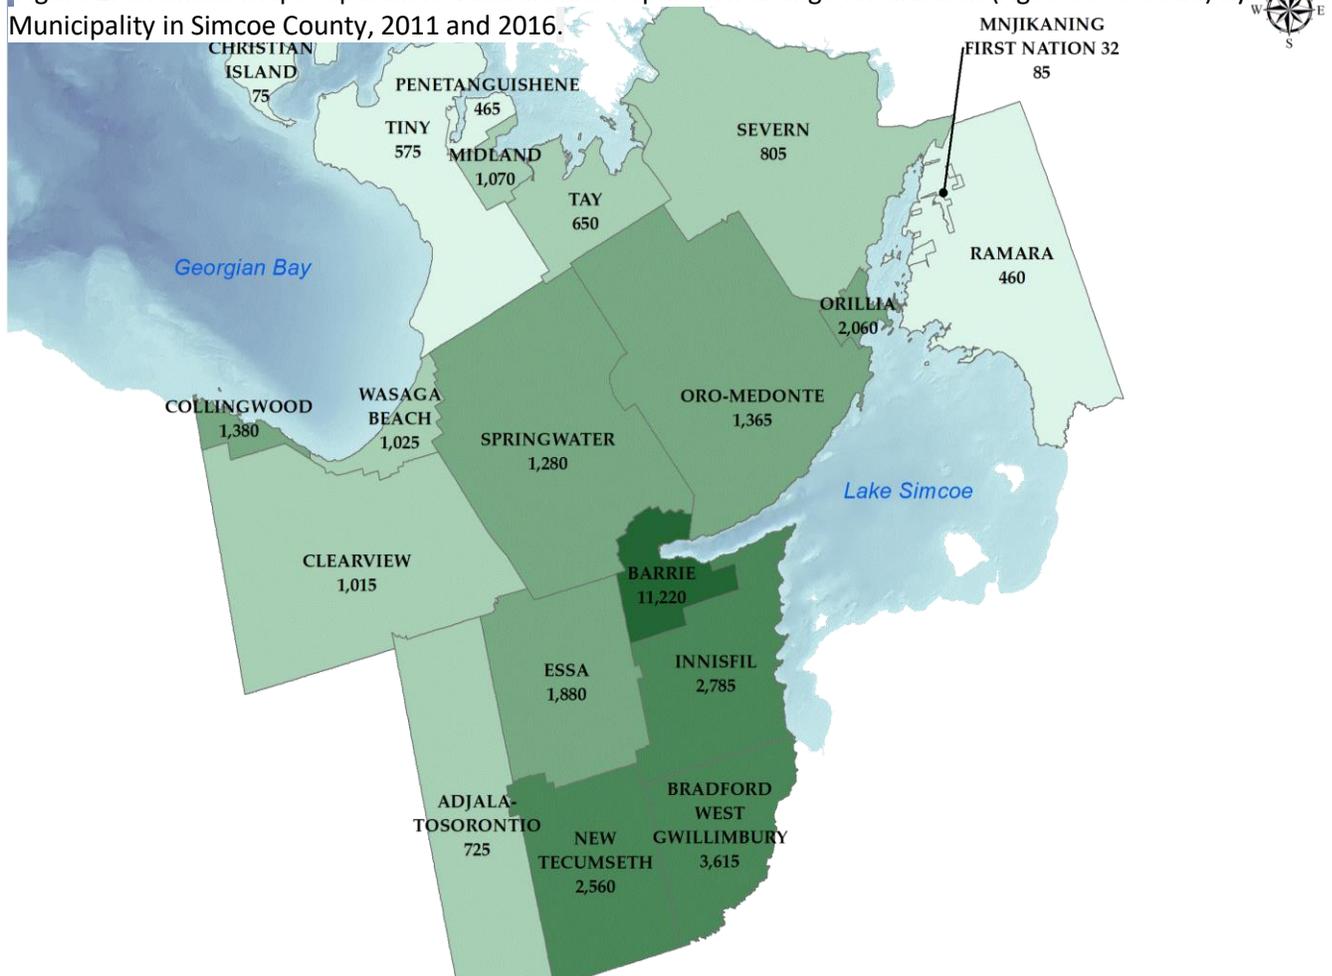

In 2016, Simcoe County had 35,100 children, aged 0 to 6 years¹, making up 7.5% of the total population. This population of children in Simcoe County, grew by 1,955, an increase of 5.9% since 2011. This growth rate was higher than the growth rates of the population of children, aged 0 to 6 years, in Ontario (0.2%) and Canada as a whole (3.3%).

The population of children, aged 0 to 6 years, made up between 4.9% and 11.5% of their respective municipality populations. The municipalities with the largest proportion of children, aged 0 to 6 years, were Christian Island (11.5%), Bradford West Gwillumbury (10.3%) and Mnjikaning First Nation (9.8%). In Simcoe County, the largest distribution of children, aged 0 to 6 years, were living in Barrie (11,220, 32.0%), Bradford West Gwillumbury (3,615, 10.3%) and Innisfil (2,785, 7.9%).

The population change rates for children, aged 0 to 6 years, amongst Simcoe County municipalities, ranged between -19.0% and 44.0%. Bradford West Gwillumbury had the strongest growth rate at 44.0%, followed by Essa (16.4%), Severn (15.0%), and Innisfil (14.8%). The five municipalities that experienced a drop in the population of children, aged 0 to 6 years, were: Mnjikaning First Nation (-19.0%), Penetanguishene (-13.1), Barrie (-3.4%), Ramara (-3.2%), and Springwater (-2.7%).

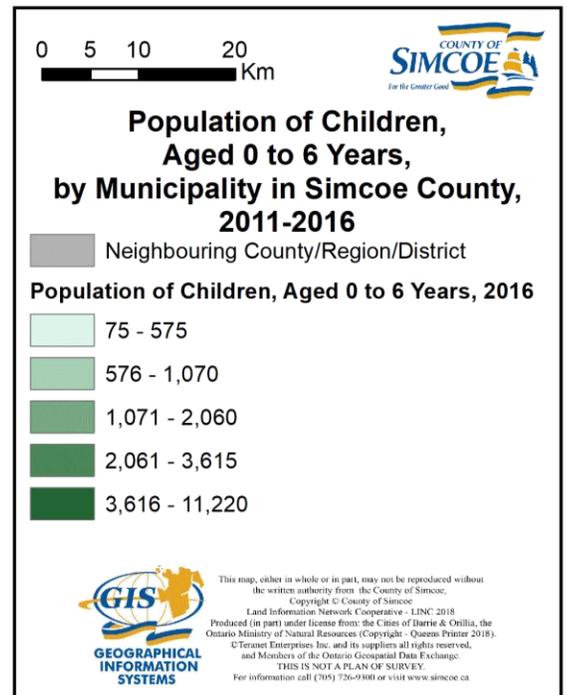

¹ 'Age' refers to the age at last birthday before the reference date, that is, before May 10, 2016.

* Christian Island 30 and Christian Island 30A data are combined.
¹ Total population percentage was calculated by taking each municipality's number of 0-6 year old persons, and dividing by each municipality's total population (all ages).
² Distribution was calculated by taking the population numbers of 0-6 year olds in each municipality and dividing by total population number of 0-6 year olds in Simcoe County.

Generation Status

In 2016, in Simcoe County, 470 children, under the age of 7, were foreign-born (first generation) and 6,945 children under the age of 7, were born in Canada to at least one foreign-born parent (second generation). This first and second generation population, aged 0 to 6 years (7,415), represented 21.1% of the total 0-6-year-old population of children in Simcoe County. In 2016, the municipalities with the largest proportion of children, aged 0 to 6 years, who were first or second generation, were Bradford West Gwillimbury (47.6%), Barrie (24.4%), New Tecumseth (23.4%) and Innisfil (22.8%). In 2016, the largest distribution of children, aged 0 to 6 years, who were first or second generation, lived in Barrie (36.9%) and Bradford West Gwillimbury (23.2%).

Note:

*Christian Island 30 and Christian Island 30A data are combined.

*** Value is less than 20, so data is suppressed. Data suppression has been adopted to further protect the confidentiality of individual respondents' personal information.

1. '**Generation status**' refers to whether or not the person or the person's parents were born in Canada.

2. '**First generation**' includes persons who were born outside Canada. For the most part, these are people who now, or once were, immigrants to Canada

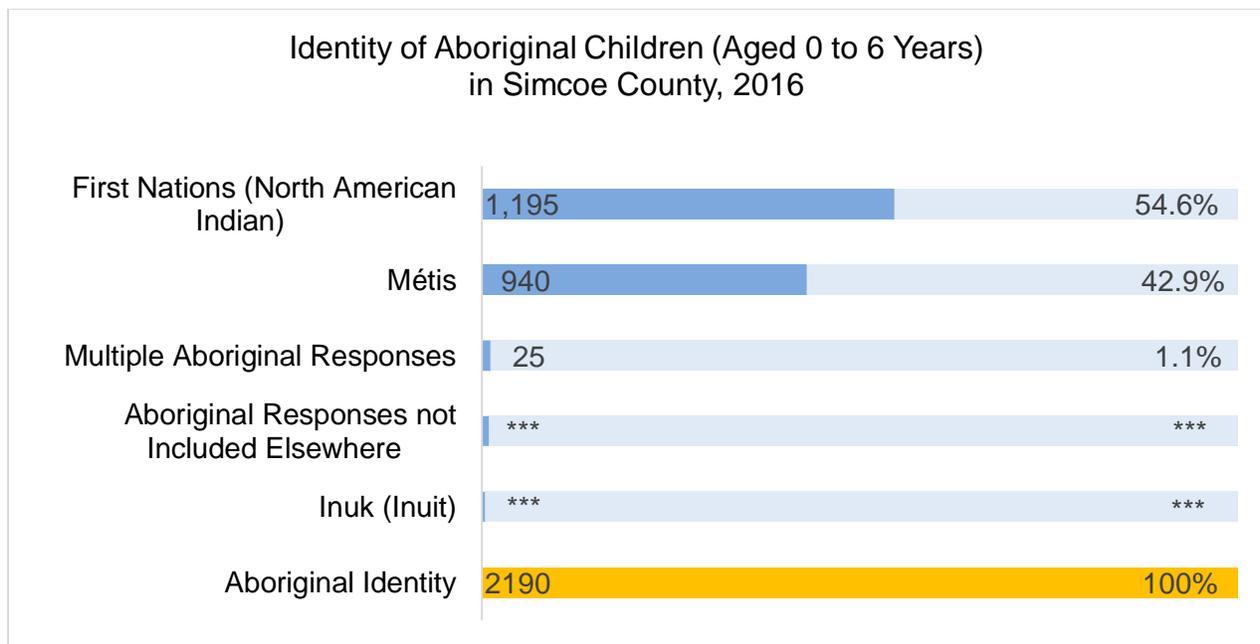

3. '**Second generation**' includes persons who were born in Canada and had at least one parent born outside Canada. For the most part, these are the children of immigrants.

Aboriginal Population

Aboriginal Identity

In 2016, in Simcoe County, 6.2% (2,190) of children, under the age of 7, identified as Aboriginal. This population of children includes the following: First Nations (1,195, 54.6%), Métis (940, 42.9%), and Inuk (***)

Figure 2: Identity of Aboriginal Children (Aged 0 to 6 Years) in Simcoe County, 2016.

Notes:

*** Data suppression has been adopted to further protect the confidentiality of individual respondents' personal information. Data suppression has occurred for two values to prevent disclosure by subtraction.

1. **'Aboriginal identity'** includes persons who are First Nations (North American Indian), Métis or Inuk (Inuit) and/or those who are Registered or Treaty Indians (that is, registered under the Indian Act of Canada) and/or those who have membership in a First Nation or Indian band. Aboriginal peoples of Canada are defined in the Constitution Act, 1982, section 35 (2) as including the Indian, Inuit and Métis peoples of Canada

2. **'Multiple Aboriginal responses'** includes persons who are any two or all three of the following: First Nations (North American Indian), Métis or Inuk (Inuit).

3. **'Aboriginal responses not included elsewhere'** includes persons who are not First Nations (North American Indian), Métis or Inuk (Inuit) but who have Registered or Treaty Indian status and/or Membership in a First Nation or Indian band.

Aboriginal Population Numbers

In 2016, the following municipalities had the largest proportion of Aboriginal children, aged 0 to 6 years: Mnjikaning First Nation (94.1%), Christian Island (86.7%) and Midland (25.2%). In 2016, the largest distribution of Aboriginal identifying children, aged 0-6 years, lived in Barrie (26.5%), Midland (12.3%) and Orillia (10.5%).

Aboriginal Population Change

Past Censuses have emphasized two key characteristics of the Aboriginal Population: Aboriginal people are both young in age and growing in number. Two main factors have contributed to the growing Aboriginal population: 1) natural growth, which includes increasing life expectancy and relatively high fertility rate; 2) the changes in the self-reported identification, more people are newly identifying as Aboriginal on the Census (Statistics Canada, 2017)². In Simcoe County, the number of Aboriginal children, aged 0 to 14 years, has grown by 94.3%, from 2,610 in 2006 to 5,070 in 2016. The municipalities that experienced the largest growth are Springwater (290.9%), Wasaga Beach (275.0%), and Severn (260.0%). The only municipality that experienced a decline in growth was Penetanguishene (-9.6%).

2016 and 2006 to 2016 have been adjusted for incompletely enumerated Indian reserves and Indian settlements, and other changes in reserves to allow for comparison of the different census year periods.

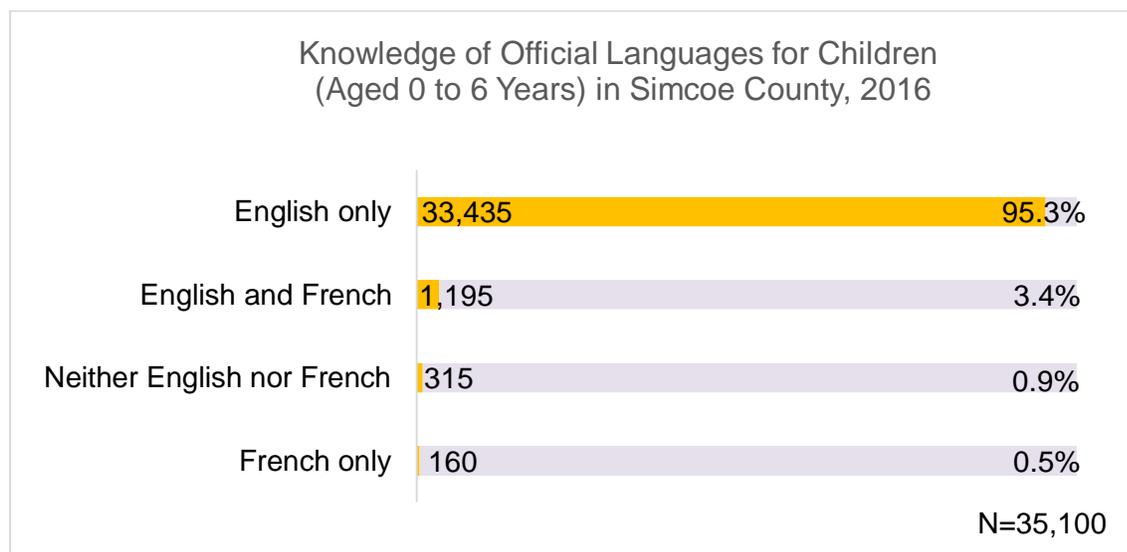

Language

Knowledge of Official Languages

Almost all children, aged 0-6 years, in Simcoe County know at least one official language. In fact, in 2016, 99.1% (34,790) of the population, aged 0 to 6 years, could speak either English or French, or both. That year, 95.3% of children, aged 0 to 6 years, knew English only, 0.5% knew French only and 3.4% knew both English and French.

Overall, the number of children, aged 0 to 6 years, who can conduct a conversation in at least one official language (34,790) is higher than the number of children who have English or French or both as their mother tongue language (32,920). The difference of 1,870 children, aged 0 to 6 years, shows the acquisition of English and or French as a second language.

Figure 3: Knowledge of Official Languages for Children (Aged 0 to 6 Years) in Simcoe County, 2016.

Source:
Statistics Canada. 2018. *Target group profile of the population by age groups, Census, 2016*. Census of Canada (database). Community Data Program (distributor).

Notes:
'Knowledge of official languages' refers to whether the person can conduct a conversation in English only, French only, in both languages or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.

Francophone

In 2016, in Simcoe County, 1,985 children, aged 0 to 14 years, identified as being Francophone¹, representing 2.5% of the total 0-14-year-old population in Simcoe County, which is less than the Ontario percentage of 5.0%. In 2016, the municipalities with the largest percentage of Francophone children, aged 0 to 14 years, were: Essa (9.9%), Tiny (5.0%) and Penetanguishene (4.4%). In 2016, the areas with the largest distribution of the Francophone population, aged 0 to 14 years, were Barrie (34.8%) and Essa (19.6%).

2. Russian Здравствуйте
3. Mandarin 你好
4. Urdu صبح بخیر
5. Polish Cześć

Source:

Statistics Canada. 2018. *Target group profile of the population by age groups, Census, 2016*. Census of Canada (database). Community Data Program (distributor).

Notes:

'**Mother tongue**' refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person. For a child who has not yet learned to speak, the mother tongue is the language spoken most often to this child at home. The child has two mother tongues only if both languages are spoken equally often so that the child learns both languages at the same time.

Low Income

Low Income (LIM-AT)

The low-income measure after tax (LIM-AT), is an internationally used measure of low income. The concept underlying the LIM-AT is that a household has low income if its income is less than half of the median income of all households. In 2015, in Simcoe County, there were 5,615 children, aged 0 to 6 years, living in low-income, accounting for a prevalence of 16.1% low income. The low-income prevalence was the highest in Orillia (35.9%), Midland (28.6%) and Penetanguishene (28%), and the lowest in Springwater (3.9%), Oro Medonte (5.5%) and Essa (8.5%). The largest distribution of children, aged 0 to 6 years, living in low income, was in Barrie (34.3%).

Table 5: Number and Prevalence of Children (Aged 0 to 6 Years) Living in Low Income (LIM-AT) by Municipality in Simcoe County, 2015.

1. '**Low income measure after tax (LIM-AT)**' refers to a fixed percentage (50%) of median-adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase, (continue on next page)

but at a decreasing rate, as the number of members increases.

2. 'Prevalence of low income' is the proportion or percentage of units whose income falls below a specified low-income line.

Change in Low Income (LIM-AT)

Simcoe County experienced an increase of 42.4% in the number of children, aged 0 to 5 years, living in low-income, from 2005 (3,310) to 2015 (4,715), which is much higher than the increase of 16.2% that Ontario experienced. In Simcoe County, the prevalence of low income increased by 3.9% from 2005 (12.1%) to 2015 (16.0%). This increase in the prevalence of low income was highest in Orillia (15.9%) followed by Ramara (13.5%) and Penetanguishene (10.6%). On the other hand, the municipalities with the largest decrease in the prevalence of low-income were: Tay (-10.7%), Oro-Medonte (-4.3%) and Tiny (-3.6%).

Statistics Canada. 2017. *Population in private households for income status, number of persons in low income, prevalence of low income based on the low-income concept - Low-income measure, after-tax (LIM-AT), by age groups (total - age groups), Canada and census subdivisions (municipalities), 2016 Census*. Highlight Table. Statistics Canada Catalogue no. 98-402-X2016006.

Notes:

1. 'Low income measure after tax (LIM-AT)' refers to a fixed percentage (50%) of median-adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase, (continue on next page)

but at a decreasing rate, as the number of members increases.

2. **'Prevalence of low income'** is the proportion or percentage of units whose income falls below a specified low-income line.

3. The low-income concepts are also not applied in the territories and in certain areas based on census subdivision type (such as Indian reserves). The existence of substantial in-kind transfers (such as subsidized housing and First Nations band housing) and sizeable barter economies or consumption from own production (such as product from hunting, farming or fishing) could make the interpretation of low-income statistics more difficult in these situations.

Family Characteristics of Children

Children Living in Lone Parent Census Families

In 2016, in Simcoe County, 16,070 children, aged 0 to 14 years, were living in a lone parent Census family, representing 20.4% of the total population of 0-14-year-old children in Simcoe County, which increased by 7.6% since 2011. There were more children living with a female lone parent (13,150) than a male lone parent (2,915). The number of children living with a male lone parent increased by 11.7 % from 2011, whereas, the number of children living with a female lone parent increased by 6.7%. This increase in children living with a male lone parent follows the same trend as seen in Canada overall (Statistics Canada, 2018)³. According to Statistics Canada, "in 1976, stay-at-home fathers accounted for approximately 1 in 70 of all Canadian families with a stay-at-home parent. By 2015, the proportion had risen to about 1 in 10" (Statistics Canada, 2018).

In 2016, the municipalities with the largest proportion of children, aged 0 to 14 years, living in a lone parent Census family were: Orillia (35.0%), Midland (32.2%), Christian Island (31.3%), and Mnjikaning First Nation (29.3%). In Simcoe County, the largest distribution of children living in a lone parent Census family was in Barrie (37.5%). The municipalities with the largest increase in children living in lone parent Census families from 2011 to 2016 were Wasaga Beach (41.3%) and Bradford West Gwillimbury (34.7%). The municipalities with the largest decrease in children living in lone parent Census families from 2011 to 2016 were: Tay (-14.9%) and Adjala-Tosorontio (-11.6%).

Children Living with Grandparents (without parents present)

In 2016, in Simcoe County, 400 children, aged 0 to 14 years, were living with one or two grandparents, without parents present, representing 0.5% of the total population of 0-14-year-old children in Simcoe County, (same as Ontario's percentage of 0.5%), which increased by 12.7% since 2011.***

1. One or more grandparents of the child may also be present in the household of children who are 'living with one parent in a lone parent census family'.

Glossary

A

'Aboriginal identity' refers to whether the person identified with the Aboriginal peoples of Canada. This includes those who are First Nations (North American Indian), Métis or Inuk (Inuit) and/or those who are Registered or Treaty Indians (that is, registered under the *Indian Act* of Canada), and/or those who have membership in a First Nation or Indian band. Aboriginal peoples of Canada are defined in the *Constitution Act*, 1982, Section 35 (2) as including the Indian, Inuit and Métis peoples of Canada.

'Aboriginal responses not included elsewhere' includes persons who are not First Nations (North American Indian), Métis or Inuk (Inuit) but who have Registered or Treaty Indian status and/or Membership in a First Nation or Indian band.

'Age' refers to the age of a person (or subject) of interest at last birthday (or relative to a specified, well-defined reference date).

Many age groups can be used, such as 5-year age groups and open age groups:

- 5-year age groups: 0 to 4, 5 to 9, 10 to 14, ..., 95 to 99;
- Broader age groups: 0 to 14 (children), 15 to 64 (working-age population), 55 to 64;
- Open age groups: 65+ (seniors), 85+ and 100+ (centenarians).

C

'Census family' is defined as a married couple and the children, if any, of either and/or both spouses; a couple living common law and the children, if any, of either and/or both partners; or a lone parent of any marital status with at least one child living in the same dwelling and that child or those children. All members of a particular census family live in the same dwelling. A couple may be of opposite or same sex. Children may be children by birth, marriage, common-law union or adoption regardless of their age or marital status as long as they live in the dwelling and do not have their own married spouse, common-law partner or child living in the dwelling. Grandchildren living with their grandparent(s) but with no parents present also constitute a census family.

F

For the 2016 **'Francophone'** data, used in this profile, and obtained from the Community Data Program's Target Group Profile, the following are individuals that are included (list obtained from the Community Data Program website):

FOL = First official language spoken; MT = Mother tongue; HLnDr = Language spoken most often at home

- 1.French only (FOL/MT/HLnDr)
- 2.French (FOL) and French & Non-official language (MT/HLnDr)
- 3.French (FOL) and English & French (MT/HLnDr)
- 4.French (FOL) and English, French & Non-official language (MT/HLnDr)
- 5.French (FOL) and Non-official language (MT/HLnDr)
- 6.English (FOL) and French (MT/HLnDr)
- 7.English (FOL) and French & Non-official language (MT/HLnDr)
- 8.English (FOL) and English, French & Non-official language (MT/HLnDr)

- 9.English (FOL) and English & French (MT/HLnDr)
- 10.English & French (FOL) and French (MT/HLnDr)
- 11.English & French (FOL) and English & French (MT/HLnDr)
- 12.English & French (FOL) and French & Non-official language (MT/HLnDr)
- 13.English & French (FOL) and English, French & Non-official language (MT/HLnDr)
- 14.English & French (FOL) and Non-official language (MT/HLnDr)
- 15.English & French (FOL) and English & Non-official language (MT/HLnDr)
- 16.French (FOL) and English & Non-official language (MT/HLnDr)
- 17.French (FOL) and English (MT/HLnDr)
- 18.English & French (FOL) and English OR English & Non-official language (MT/HLnDr)
- 19.Non-official language (FOL) and French OR French & Non-official language (MT/HLnDr)

'First generation' includes persons who were born outside Canada. For the most part, these are people who now, or once were, immigrants to Canada.

'First Nations' (North American Indian) - Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the 2016 Census of Population. For additional information, refer to the [Aboriginal Peoples Reference Guide, Census of Population, 2016](#).

I

'Immigrant' refers to a person who is, or who has ever been, a landed immigrant or permanent resident. Such a person has been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this group.

K

'Knowledge of official languages' refers to whether the person can conduct a conversation in English only, French only, in both or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.

L

'Low-income measure, after tax', refers to a fixed percentage (50%) of median adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase, but at a decreasing rate, as the number of members increases. Using data from the 2016 Census of Population, the line applicable to a household is defined as half the Canadian median of the adjusted household after-tax income, multiplied by the square root of household size. The median is determined based on all persons in private households where low-income concepts are applicable. Thresholds for specific household sizes are presented in [Table 4.2 Low-income measures thresholds \(LIM-AT and LIM-BT\) for private households of Canada, 2015](#), *Dictionary, Census of Population, 2016*.

Dictionary, Census of Population, 2016

Table 4.2 Low-income measures thresholds (LIM-AT and LIM-BT) for private households of Canada, 2015

Release date: September 13, 2017

Household size ¹	After-tax income	Before-tax income
1 person	22,133	25,516
2 persons	31,301	36,084
3 persons	38,335	44,194
4 persons	44,266	51,031
5 persons	49,491	57,054
6 persons	54,215	62,500
7 persons	58,558	67,508

¹ To convert to other household sizes, multiply the value in the one-person household by the square root of the desired household size.

Source: Statistics Canada, 2016 Census of Population.

When the unadjusted after-tax income of household pertaining to a person falls below the threshold applicable to the person based on household size, the person is considered to be in low income according to LIM-AT. Since the LIM-AT threshold and household income are unique within each household, low-income status based on LIM-AT can also be reported for households.

For the 2016 Census, the reference period is the calendar year 2015 for all income variables.

'Low-income status' refers to the income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income.

For the 2016 Census, the reference period is the calendar year 2015 for all income variables.

The low-income concepts are not applied in the territories and in certain areas based on census subdivision type (such as Indian reserves). The existence of substantial in-kind transfers (such as subsidized housing and First Nations band housing) and sizeable barter economies or consumption from own production (such as product from hunting, farming or fishing) could make the interpretation of low-income statistics more difficult in these situations.

Since their initial publication, Statistics Canada has clearly and consistently emphasized that the low-income lines are not measures of poverty. Rather, low-income lines reflect a consistent and well-defined methodology that identifies those who are substantially worse off than average. These measures have enabled Statistics Canada to report important trends, such as the changing composition of those below the low-income lines over time.

Statistics Canada has clearly and consistently emphasized that the low-income lines are not measures of poverty. Rather, low-income lines reflect a consistent and well-defined methodology that identifies those who are substantially worse off than average. These measures have enabled Statistics Canada to report important trends, such as the changing composition of those below the low-income lines over time.

M

'Mother tongue' refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person. For a child who has not yet learned to speak, the mother tongue is the language spoken most often to this child at home. The child has two mother tongues only if both languages are spoken equally often so that the child learns both languages at the same time.

'Multiple Aboriginal responses' includes persons who are any two or all three of the following: First Nations (North American Indian), Métis or Inuk (Inuit).

N

'Non-official language' refers to all languages other than English and French. It includes Aboriginal, immigrant and sign languages.

P

'Prevalence of low income' - The proportion or percentage of units whose income falls below a specified low-income line.

For the 2016 Census, the reference period is the calendar year 2015 for all income variables.

R

'Registered or Treaty Indian status' refers to whether or not a person is a Registered or Treaty Indian. Registered Indians are persons who are registered under the *Indian Act* of Canada. Treaty Indians are persons who belong to a First Nation or Indian band that signed a treaty with the Crown. Registered or Treaty Indians are sometimes also called Status Indians.

S

'Second generation' includes persons who were born in Canada and had at least one parent born outside Canada. For the most part, these are the children of immigrants.
