Note to Readers:

Random Rounding and Percentage Distributions

To ensure the confidentiality of responses collected for the 2016 Census, a random rounding process is used to alter the values reported in individual cells. As a result, when these data are summed or grouped, the total value may not match the sum of the individual values, since the total and subtotals are independently rounded. Similarly, percentage distributions, which are calculated on rounded data, may not necessarily add up to 100%. Because of random rounding, counts and percentages may vary slightly between different census products, such as the analytical documents, highlight tables and data tables. (Statistics Canada, 2018).

Population Universe

The 2016 Census provides data on immigration and ethnocultural diversity for the population living in **private households** (Statistics Canada, 2018).

The population living in private households **includes** Canadian citizens, landed immigrants (or permanent residents) and non-permanent residents who have a usual place of residence in Canada. The population living in private households **excludes**:

- Persons living outside Canada;
- Persons living in collective dwellings; and
- Foreign residents (Statistics Canada, 2018).

Ethnic and Cultural Origins

Canada has collected data on the origins of the population in almost every Census since 1867. However, a number of factors have made it more complex to report these origins, which poses challenges for interpreting and comparing historical data. For example, the wording and format of the question of origins have changed over time. Furthermore, the social context in which questions have been asked, as well as respondents' knowledge of the ethnic and cultural history of their ancestors can influence the type of response given at the time of the Census. *Historical comparisons of ethnic and cultural origins have limitations and should be made with caution* (Statistics Canada, 2018).

Data on Indian Reserves and Indian Settlements

Persons living on Indian reserves and Indian settlements who were enumerated with the 2016 Census of Population 2A-R questionnaire were not asked the questions on citizenship (Question 13), landed immigrant status (Question 14) or year of immigration (Question 15). Consequently, citizenship, landed immigrant status, year of immigration, admission category and applicant type data are not available for Indian reserves and Indian settlements at the census subdivision level and lower levels of geography (Statistics Canada, 2017). For detailed information on the concepts, definitions, and variables used in the 2016 Census of Population, please consult the [Place of Birth, Generation Status, Citizenship and Immigration Reference Guide, Census of Population, 2016](#).

The data presented in this report does not capture information about the following census subdivisions as they are:

- Christian Island 30;
- Christian Island 30A; and
- Mnjikaning First Nation 32.

Immigrants

Statistics Canada uses the term immigrant to refer to "a person who is, or who has ever been, a landed immigrant or permanent resident. Such a person has been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this group." (Statistics Canada, 2017) The use of the term **immigrant** throughout this report refers to this definition. *Non-permanent residents* includes persons from another country who have a work or study permit or who are refugee claimants, and their family members sharing the same permit and living in Canada with them (Statistics Canada, 2016). The total population count includes the non-immigrant population, the immigrant population, and the non-permanent resident population.

Undercoverage

Undercoverage is the number of persons excluded by the Census who should have been counted, as determined by Statistics Canada. Although Statistics Canada makes a great effort to count every person, in each Census a notable number of people are left out for a variety of reasons. For example, people may be traveling, some dwellings are hard to find, and some people simply refuse to participate. **Overcoverage** can also occur when people are counted more than once or should not have been counted in a given population. Undercoverage is generally more common than overcoverage. The total impact of the coverage errors is the *net undercoverage* (City of Toronto, 2017).

Comparison with Previous Census Data

Readers must be careful when comparing estimates from two surveys, as they can differ significantly in methodology, quality and target population. The estimates from the 2016 Census long-form questionnaire were derived from a mandatory survey that had a high response rate (96.9%), while the estimates from the 2011 National Household Survey (NHS) were derived from a voluntary survey (68.6%). Estimates from the 2006 Census long-form questionnaire were also derived from a mandatory survey. The response rate for the 2006 Census long-form questionnaire was 93.8%. This allows for comparison between the 2016 Census and 2006 Census data but not for accurate comparisons with the 2011 NHS data (Statistics Canada, 2018). For detailed information, please refer to the [Guide to the Census of Population, 2016](#).

The [Glossary](#) of principal terms is available on page 37. For detailed information on the concepts, definitions, and variables used in the 2016 Census of Population, please consult the [Dictionary, Census of Population, 2016](#).

For detailed information on each topic by the municipality, please refer to the tables in the [Appendices](#) on page 48.

Visit [Simcoe.ca/communitydata](https://simcoe.ca/communitydata) for more Simcoe County reports and local data.

Immigrants and Recent Immigrants

In addition to contributing to the social and economic development of the Simcoe County, immigrants and their dependants play a significant role in shaping and enriching the ethnic, cultural and linguistic composition of the population living in Simcoe County. Overall, the 2016 Census results show the various facets of diversity in Simcoe County.

Immigrants Status

In Simcoe County, the 2016 Census enumerated 61,610 immigrants¹ who came to Canada through the immigration process. Immigrants accounted for 13.1% of the Simcoe County's total population. *For the detailed information, please refer to the [Appendix 1: Immigrant Status by Municipality in Simcoe County, 2006-2016](#) (page 48).*

From 2006 to 2016, the immigrant population in Simcoe County grew by 20.0%, much faster than growth in the County's non-immigrant population² (+12.0%). This increase may be due to the large number of immigrants admitted into Canada each year, the gradual rise in the number of deaths and the relatively low fertility levels in Canada. (Statistics Canada, 2017).

Simcoe County attracted 4,110 recent immigrants³ who arrived to Canada during the 2011-2016 period. These newcomers made up 6.7% of the total immigrant population in 2016.

Table 1: Immigrant Status in Simcoe County, 2006-2016

Immigrant Status	#	% of Total Population	% Change, 2006-2016
Immigrants	61,605	13.1%	20.0%
Recent Immigrants (2011-2016)	4,115	0.9%	N/A
Non-Permanent Residents	1,640	0.3%	1.9%
Non-Immigrants	407,880	86.6%	12.0%
Total Population	471,130	100.0%	13.0%

1. 2016 Census, *Highlight Tables* (No. 98-402-X2016007)
2. 2006 Census, *Highlight Tables* (No. 97-557-XWE2006002)

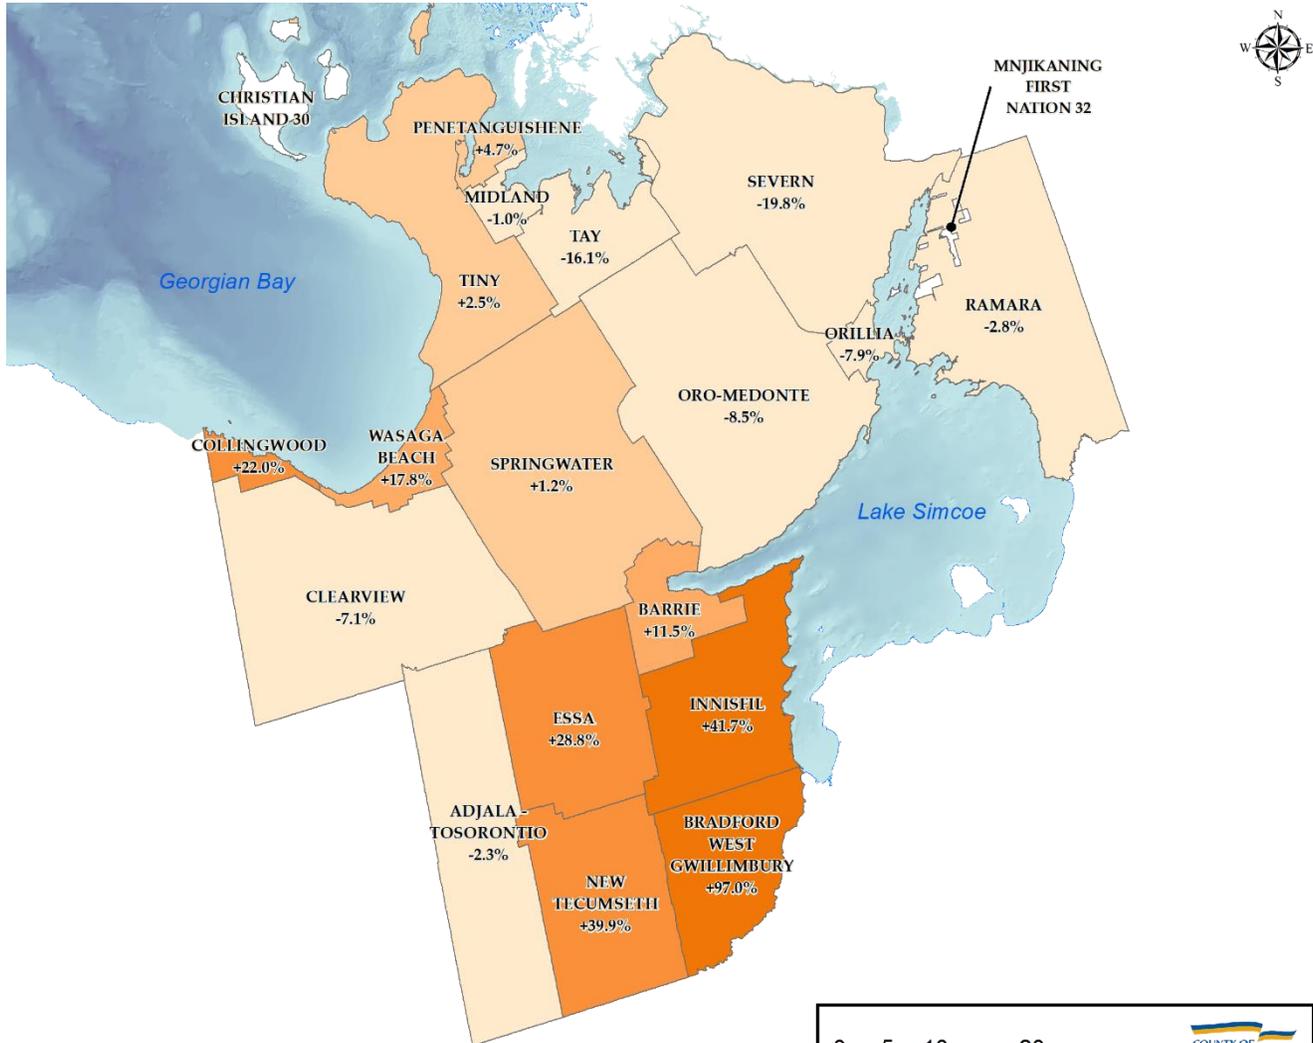

¹ Statistics Canada uses the term **immigrant** to refer "to a person who is, or who has ever been, a landed immigrant or permanent resident. Such a person has been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this group." (Statistics Canada, 2017) The use of the term **immigrant** throughout this report refers to this definition and does not include *non-permanent residents* such as people from other countries in Canada on work or study permits. The **total population** count includes the *non-immigrant population*, the *immigrant population* and the *non-permanent resident population*.

² **Non-immigrants** includes persons who are Canadian citizens by birth.

³ **Recent immigrant** refers to an immigrant who first obtained his or her landed immigrant or permanent resident status between January 1, 2011 and May 10, 2016.

⁴ **Non-permanent residents** includes persons from another country who have a work or study permit or who are refugee claimants, and their family members sharing the same permit and living in Canada with them.

Age Category

According to the 2016 Census, the average age of immigrants living in Simcoe County was 56.0 years old⁵, while the average age for the total population was 41.4 years old. Second generation individuals are not considered immigrants as they were born in Canada, and were excluded from the analysis. The average age for recent immigrants was 34.4 years old. Non-permanent residents were the youngest population group with an average age of 32.3 years. *For the detailed information, please refer to the [Appendix 2: Age Category for the Immigrant Population by Municipality in Simcoe County, 2006-2016](#) (page 50).*

Figure 1: Distribution of Immigrants by Age Category in Simcoe County, 2016

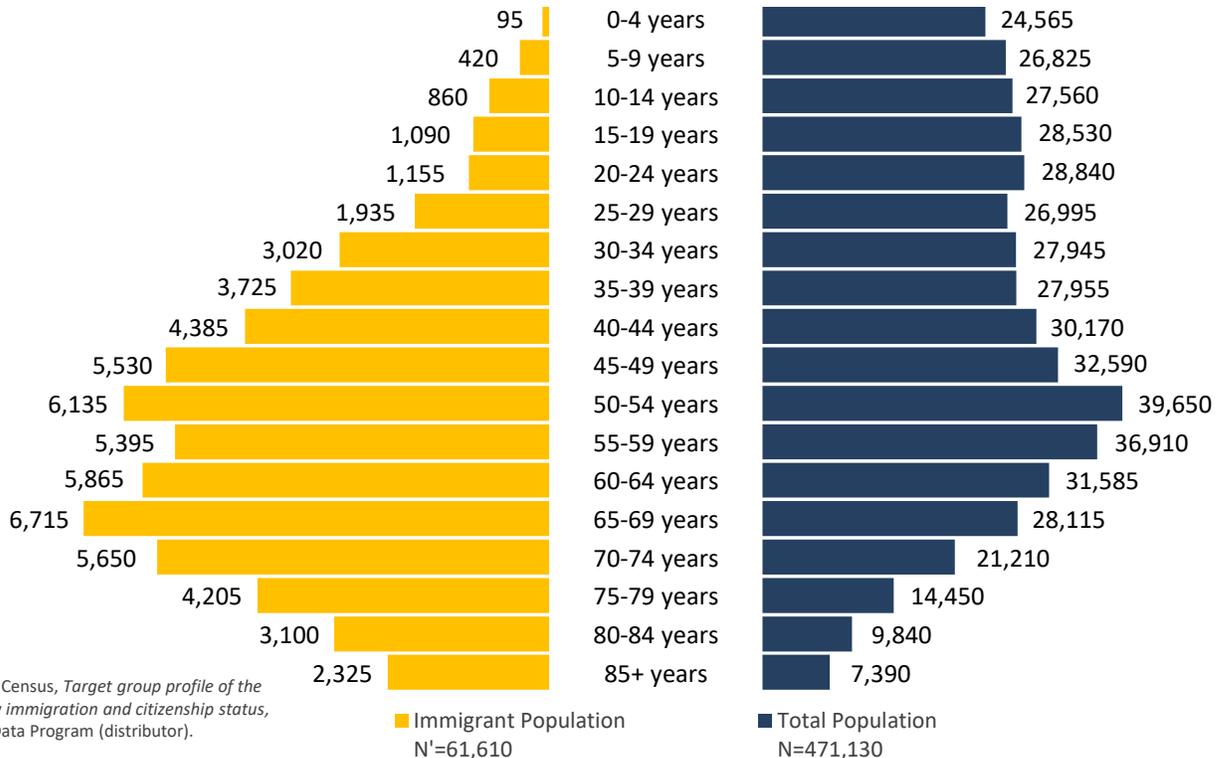

Source: 2016 Census, Highlight Tables (No. 98-402-X2016007)

N=61,605

Between 2006 and 2016, the largest change in the immigrant population was an increase in the 30-34 age group (+43.8%), which increased from 2,100 in 2006 to 3,020 in 2016. Other changes included an increase in the 50-54 age group (+40.5%) and 65-69 age group (+39.3%).

Figure 2: Age Pyramid for Immigrants and Total Population in Simcoe County, 2016

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

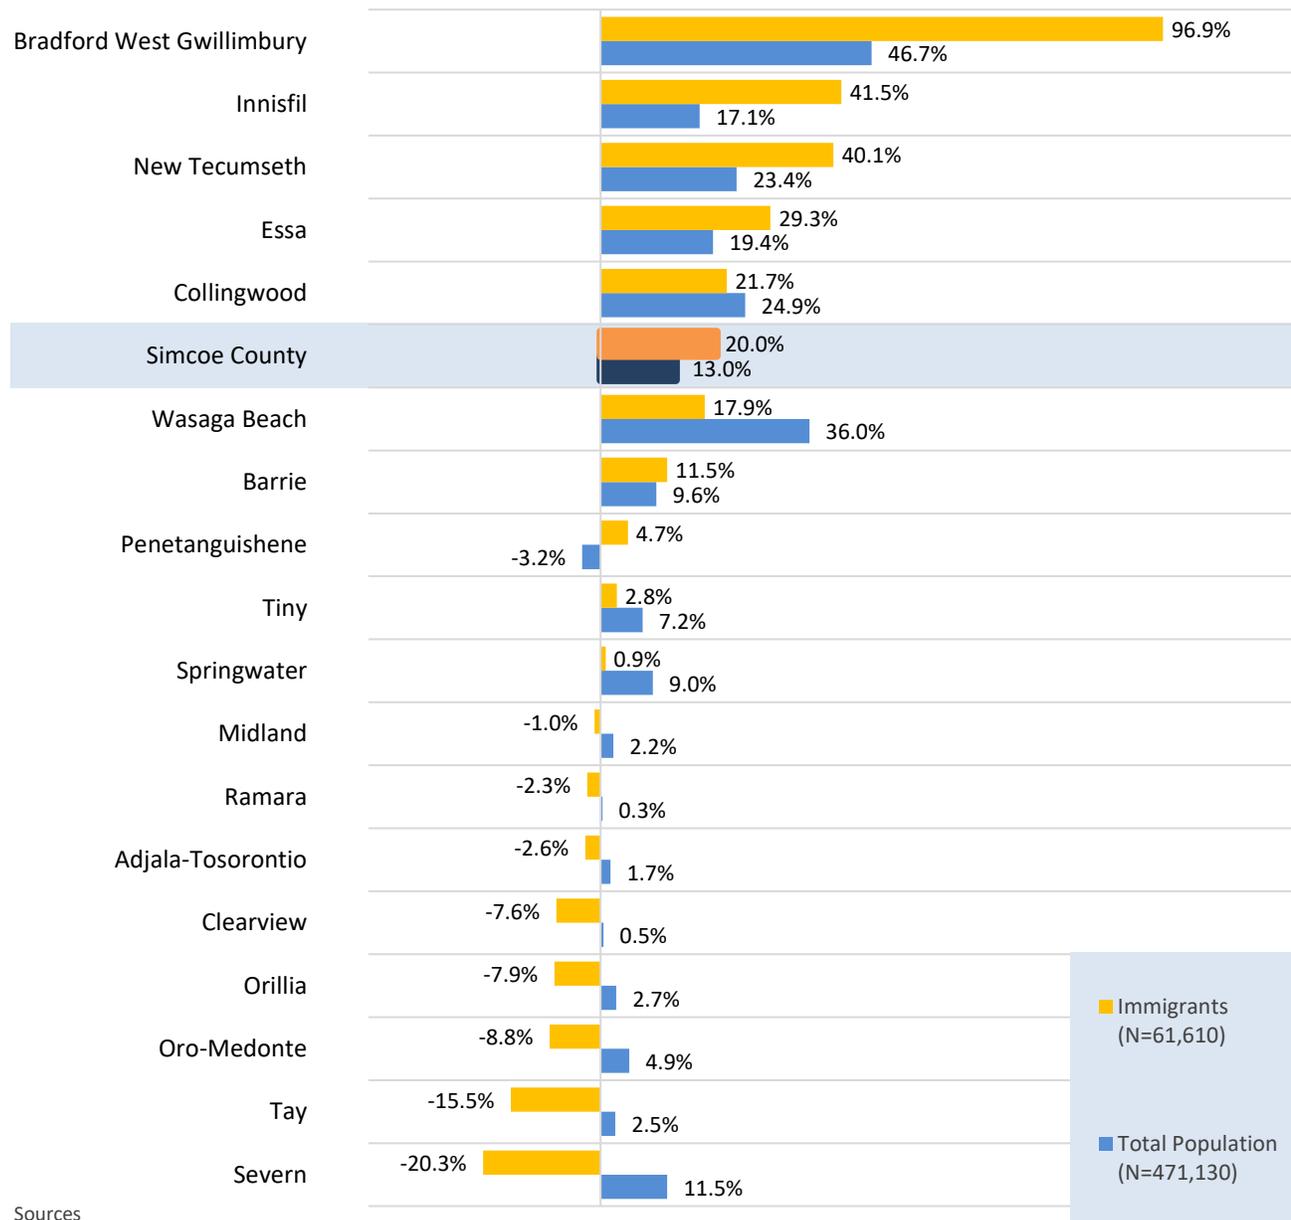

⁵ Age refers to the age at last birthday before the reference date, that is, before May 10, 2016.

Immigrants by Municipality

The immigrant population has changed unevenly across the Simcoe County. Between 2006 and 2016, the number of immigrants in Bradford West Gwillimbury has almost doubled (+96.9%). The proportion of immigrants rose from 20.5% (4,885) in 2006 to 27.5% (9,620) in 2016. Innisfil (+41.5%) and New Tecumseth (+40.1%) also saw a large increase in the proportion of immigrants over a ten-year period.

In contrast, 8 out of the 18 municipalities experienced a drop in the proportion of immigrants; 5 of these were in the north. The drop in proportion were largest in Severn (-20.3%), Tay (-15.5%), and Oro-Medonte (-8.8%). *For the detailed information, please refer to the [Appendix 1: Immigrant Status by Municipality in Simcoe County, 2006-2016](#) (page 48).*

Figure 3: Population Change Rates for Immigrants and Total Population by Municipality in Simcoe County, 2006-2016

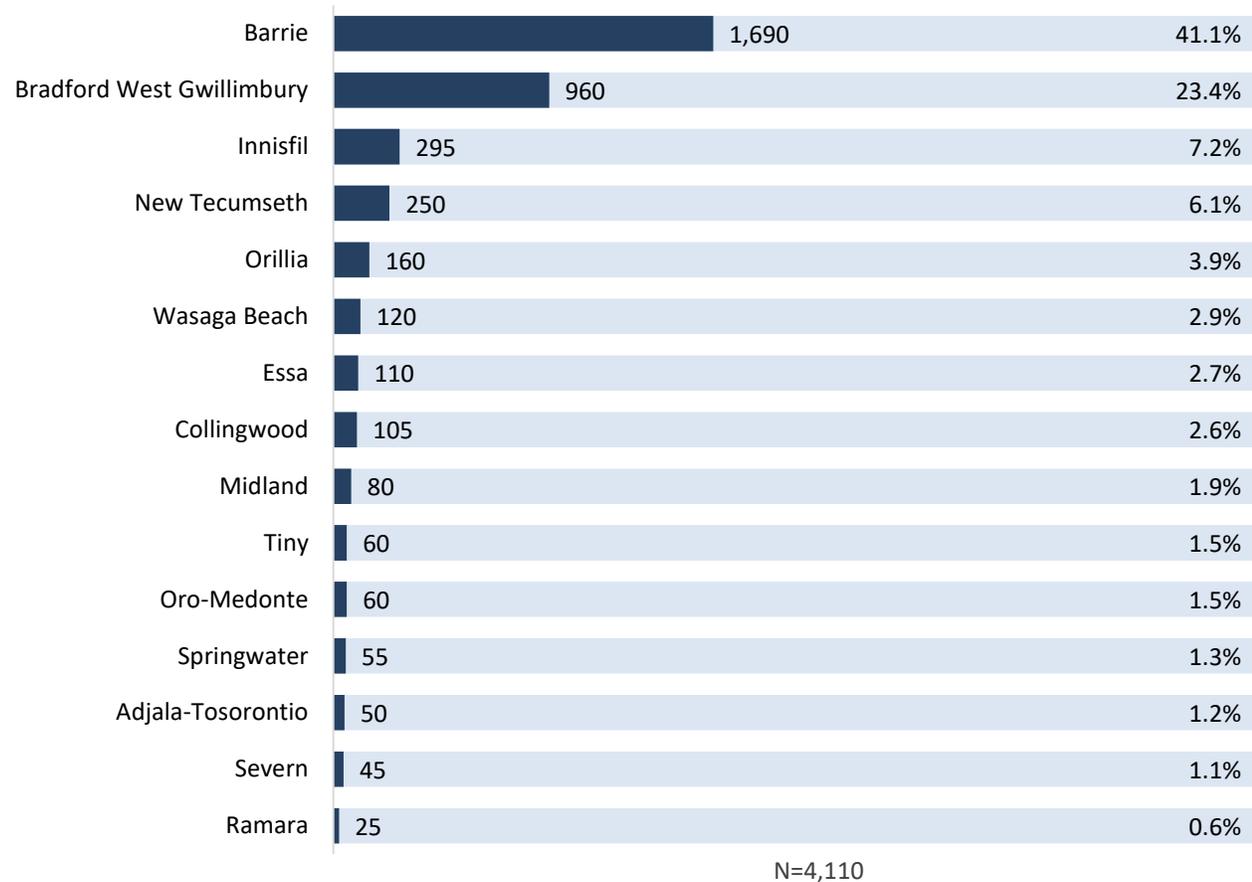

Sources

1. 2016 Census, *Highlight Tables* (No. 98-402-X2016007)
2. 2006 Census, *Highlight Tables* (No. 97-557-XWE2006002)

In 2016, Barrie, Bradford West Gwillimbury, and Innisfil are the most populous destinations choice of recent immigrants (71.7%) and immigrants (55.2%) in Simcoe County.

Among the 4,110 recent immigrants in Simcoe County, 41.1% (1,690) settled in Barrie, 23.4% (960) in Bradford West Gwillimbury, 7.2% (295) in Innisfil, and 28.2% in the rest of the county. *For the detailed information, please refer to the [Appendix 4: Period of Immigration for the Immigrant Population by Municipality in Simcoe County, 2016](#) (page 53).*

Figure 4: Distribution of Recent Immigrants by Municipality in Simcoe County, 2016

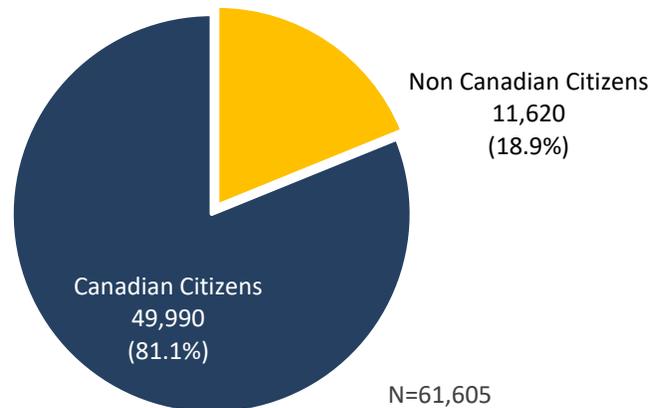

Source: 2016 Census, *Highlight Tables* (No. 98-402-X2016007)

Citizenship

Citizenship refers to the legal citizenship status of a person. Canadian citizenship can be obtained by birth or by naturalization. Naturalization is the process through which immigrants acquire Canadian citizenship. Permanent residents who have met certain criteria are eligible for Canadian citizenship by naturalization. The criteria for acquiring citizenship generally includes a residency requirement, knowledge of English or French, and basic knowledge of Canada. For many immigrants, becoming a Canadian citizen is the final step of the immigration process. Immigrants affirm their allegiance to Canada, the country in which they have settled. At the same time, naturalized citizens have rights, such as the right to vote and to hold public office that are not available to non-citizens (Statistics Canada, 2018).

According to the 2016 Census, 81.8% (49,990) of immigrants living in Simcoe County are Canadian citizens by naturalization⁶. The number of naturalization increased slightly from 41,185 in 2006 to 49,990 in 2016 (+21.4%)⁷. For the detailed information, please refer to the [Appendix 3: Citizenship for the Immigrant Population by Municipality in Simcoe County, 2006-2016](#) (page 51).

Figure 5: Immigrants by Citizenship in Simcoe County, 2016

Source: 2016 Census, *Target group profile of the population by immigration and citizenship status*, Community Data Program (distributor).

⁶ **Citizenship** refers to the country where the person has citizenship. A person may have more than one citizenship. A person may be stateless, that is, they may have no citizenship. Citizenship can be by birth or naturalization.

⁷ **Not Canadian citizens** includes persons who are not citizens of Canada. They may be citizens of one or more other countries. Persons who are stateless are included in this category.

Places of Birth

As a result of shifts in Canada’s immigration policies and various international events relating to movements of migrants and refugees, the percentage of immigrants born in Europe has decreased from one Census to the next⁸ (Statistics Canada, 2017). The growth of the immigrant population and changes in the countries that immigration is occurring from has, over the decades, led to the greater diversification of Simcoe County’ ethnocultural characteristics.

In 2016, more than half (61.1%, or 37,630) of the immigrants, who were born outside Canada, came from countries in Europe⁹. In contrast, among the 4,110 recent immigrants who resided in Simcoe County, 50.2% (2,065) were born in Asian countries (including the Middle East). *For the detailed information, please refer to the [Appendix 5: The 5 Most Common Places of Birth for the Immigrant Population, Recent Immigrants, and Non-Permanent Residents in Simcoe County, 2016](#) (page 55).*

Source: 2016 Census, Highlight Tables (No. 98-402-X2016007)

⁸ **Place of birth** refers to the name of the geographic location where the person was born. The geographic location is specified according to geographic boundaries current at the time of data collection, not the geographic boundaries at the time of birth.

⁹ The total for regions of birth in this table is greater than the sum of the regions (Americas, Europe, Africa, Asia and Oceania) as other places of birth such as “born at sea” are not included.

Admission Category

With the 2016 Census, it is possible to classify immigrants admitted to Canada since 1980 by various admission categories. In Canada, immigrants are selected based on three main objectives: to enhance and promote economic development; to reunite families; and to fulfill the country's international obligations and uphold its humanitarian tradition (Statistics Canada, 2017).

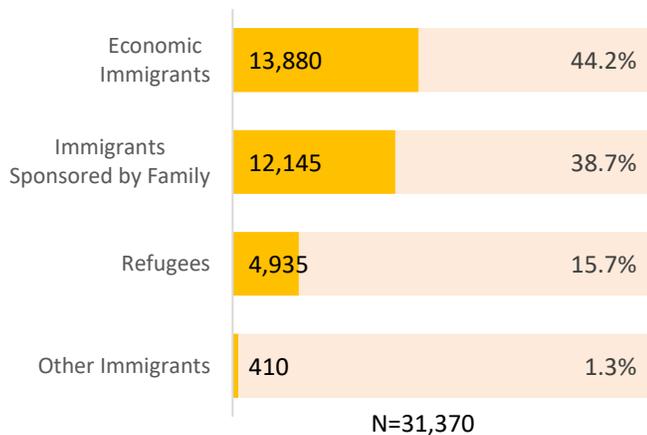

For the first time, the Census provided data on the category of admission for immigrants with permanent resident status. Data on admission category are collected by [Immigration, Refugees and Citizenship Canada \(IRCC\)](#) using administrative records. This data is available for immigrants who landed from January 1, 1980 to the day of the Census, May 10, 2016¹⁰.

In Simcoe County, there are 31,370 residents who immigrated to Canada after 1980. The majority (44.2%, or 13,880) of immigrants were admitted under the economic category, 38.7% (12,145) were admitted under the family class, and 15.7% (4,935) were admitted to Canada as refugees¹¹. *For the detailed information, please refer to the [Appendix 8: Admission Category for the Immigrant Population by Municipality in Simcoe County, 2016](#) (page 63).*

Among the 4,110 recent immigrants living in Simcoe County in 2016, approximately 5 in 10 were admitted under the family class to join family already in the country, 4 in 10 were admitted under the economic category, and 1 in 10 recent immigrants was admitted to Canada as refugees.

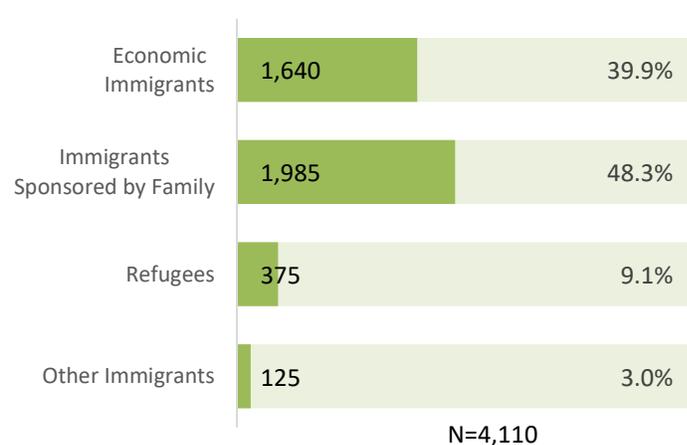

In 2012, the Provincial government released *A New Direction* in response to a clear and growing need for a new approach to immigration in Ontario, specifically to the way in which we attract, select and support new arrivals to the province. As immigration increases, the Government of Ontario aimed to raise the proportion of economic immigrants to 70%, from the current level of 52% (The Government of Ontario, 2017).

Figure 6: Distribution of Immigrants (1980-2016) by Admission Category in Simcoe County, 2016

Source: 2016 Census, *Census Profile* (No. 98-316-X2016001)

Figure 7: Distribution of Recent Immigrants (2011-2016) by Admission Category in Simcoe County, 2016

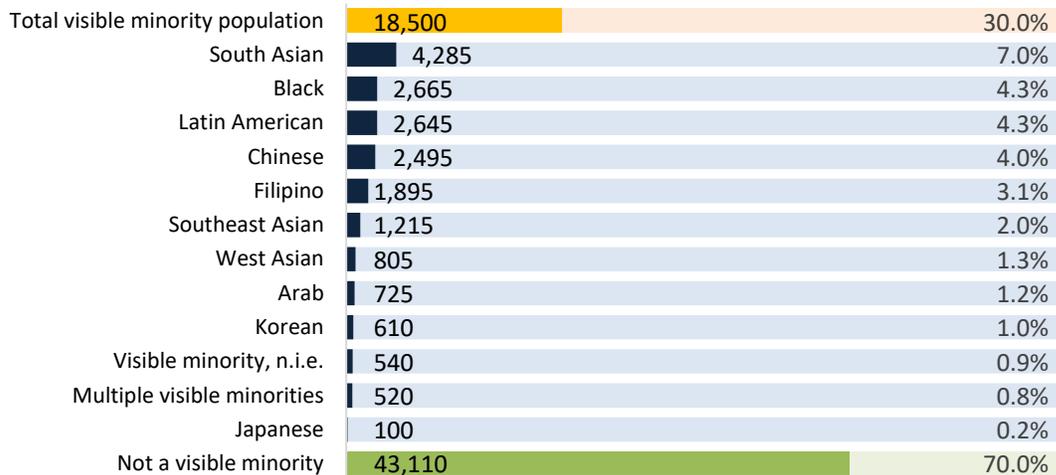

¹⁰ **Admission category** refers to the name of the immigration program or group of programs under which an immigrant has been granted for the first time the right to live in Canada permanently by immigration authorities. In the 2016 Census of Population, data on admission category and applicant type are available for immigrants who landed in Canada between January 1, 1980 and May 10, 2016.

¹¹ **Other immigrants** includes immigrants who were granted permanent resident status under a program that does not fall under the economic immigrants, the immigrants sponsored by family or the refugee categories.

Visible Minorities

In Simcoe County, 30.0% (18,500) of immigrants identified as belonging to the visible minority population as defined by the *Employment Equity Act*¹². South Asians (7.0% or 4,285), Blacks (4.3% or 2,665) and Latin Americans (4.3% or 2,645) were the three largest visible minority groups. Between 2006 and 2016, the number of visible minority immigrants doubled (+106.6%). *For the detailed information, please refer to the [Appendix 9: Visible Minority Population by Municipality in Simcoe County, 2006-2016](#) (page 65).*

Figure 8: Immigrants by Visible Minority Group in Simcoe County, 2016

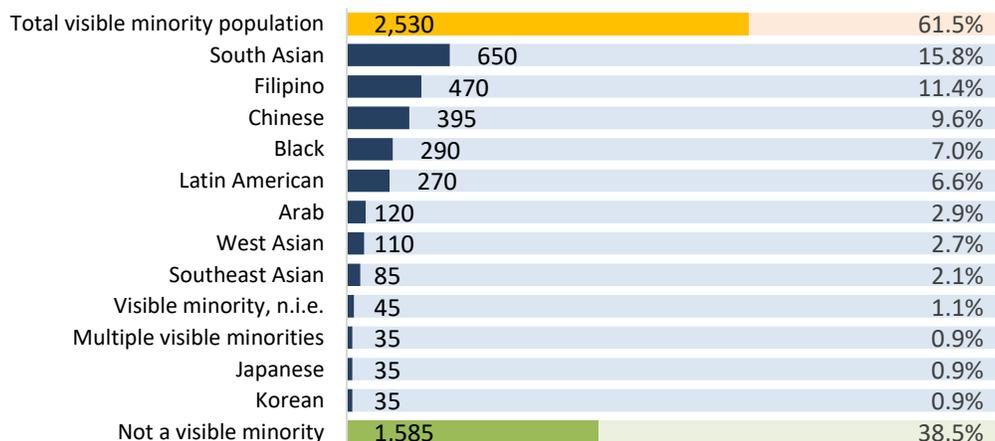

Source: 2016 Census, *Highlight Tables* (No. 98-402-X2016007)

N=61,605

In contrast, 61.5% (2,530) of recent immigrants identified as members of the visible minority population as defined by the *Employment Equity Act*. South Asians (15.8% or 650), Filipino (11.4% or 470) and Chinese (9.6% or 395) were the three largest visible minority groups.

Figure 9: Recent Immigrants (2011-2016) by Visible Minority Group in Simcoe County, 2016

Source: 2016 Census, *Highlight Tables* (No. 98-402-X2016007)

N=4,115

¹² **Visible minority** refers to whether a person belongs to a visible minority group as defined by the *Employment Equity Act* and, if so, the visible minority group to which the person belongs. The *Employment Equity Act* defines visible minorities as "persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in color". The visible minority population consists mainly of the following groups: South Asian, Chinese, Black, Filipino, Latin American, Arab, Southeast Asian, West Asian, Korean and Japanese.

Ethnic Origins

Past and recent sources of immigration have strongly influenced the current ethnic and cultural make-up of Simcoe County’s population. Ethnic origin refers to the ethnic or cultural origins of the respondent’s ancestors. An ancestor is usually more distant than a grandparent. Census data on ethnic and cultural origins are used to create a portrait of the richness, diversity, and complexity of Canada’s cultural heritage today.

In Simcoe County, approximately 210 ethnic origins or ancestries were reported by residents. The list of origins includes different groups associated with Aboriginal peoples. It also includes European groups that first settled in Canada, as well as various groups that subsequently settled in this country (Statistics Canada, 2018).

For the 2016 Census, people were able to identify with up to 6 ethnic origins. Since respondents could provide multiple responses, the number of responses on ethnic origins is greater than the total population. In Simcoe County, 53.9% (253,825) of the total population recorded two or more ethnic origins. Various factors can explain why people report one or more ancestries in the Census. These include marriages and common-law unions between people from different cultural and ethnic groups, and knowledge of family history (Statistics Canada, 2018).

Immigrants from each immigration wave in Canada, as well as their Canadian-born descendants, have contributed to the Ethnocultural diversity of the country’s population. Among the 61,610 immigrant population in Simcoe County, 71.3% (43,925) of immigrants reported European origins. English (9,960), German (5,145) and Scottish (4,975) origins are the three most common ancestries reported by the immigrants in Simcoe County, either as a single response or in combination with other ancestries (multiple responses). *For the detailed information, please refer to the [Appendix 10: Ethnic Origins by Municipality in Simcoe County, 2016](#) (page 67).*

Conversely, in the entire 4,115 recent immigrants in Simcoe County, 50.4% (2,075) of recent immigrants reported Asian origins. Filipino (485), Chinese (425) and East Indian (365) origins were the most common Asian origins reported by recent immigrants who settled in Canada between 2011 and 2016.

Figure 10: Distribution of Ethnic Origins by Immigrant Status in Simcoe County, 2016

Ethnic Origin	Immigrants (N=61,610)	Recent Immigrants (N=4,115)	Total Population (N=471,125)
European Origins	43,925 (71.3%)	1,640 (39.9%)	363,380 (77.1%)
Asian Origins	13,635 (22.1%)	2,075 (50.4%)	25,220 (5.4%)
Latin, Central and South American Origins	2,710 (4.4%)	235 (5.7%)	6,520 (1.4%)
Caribbean Origins	2,360 (3.8%)	180 (4.4%)	7,720 (1.6%)
Other North American Origins	1,950 (3.2%)	150 (3.6%)	164,685 (35.0%)
African Origins	1,575 (2.6%)	220 (5.3%)	3,995 (0.8%)
Oceania Origins	165 (0.3%)	40 (1.0%)	790 (0.2%)
North American Aboriginal Origins	140 (0.2%)	***	29,215 (6.2%)

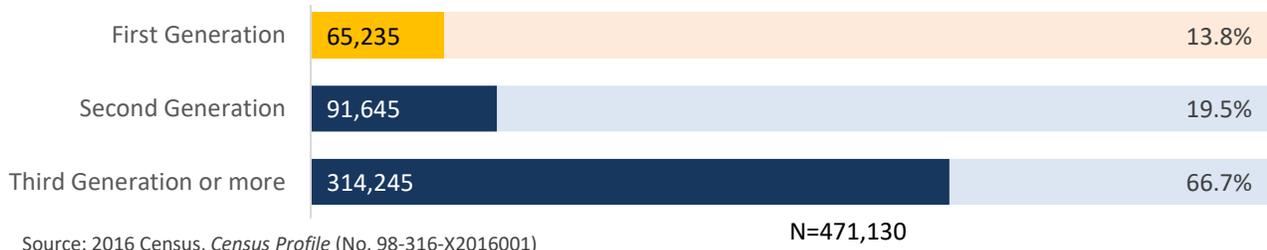

*** Value is less than 20, so data is suppressed. Data suppression has been adopted to further protect the confidentiality of individual respondents' personal information.

Generation Status (Total Population Only)

In Simcoe County in 2016, 13.8% (65,235) of the total population was born outside of Canada, and are considered as having a first-generation status. 19.5% (91,645) of the population was born in Canada and had at least one parent born outside of Canada and are second generation, and 66.7% (314,245) of the population was born in Canada to parents who were both also born in Canada, and are the third generation or later. *For the detailed information, please refer to the [Appendix 11: Generation Status by Municipality in Simcoe County, 2016](#) (page 73).*

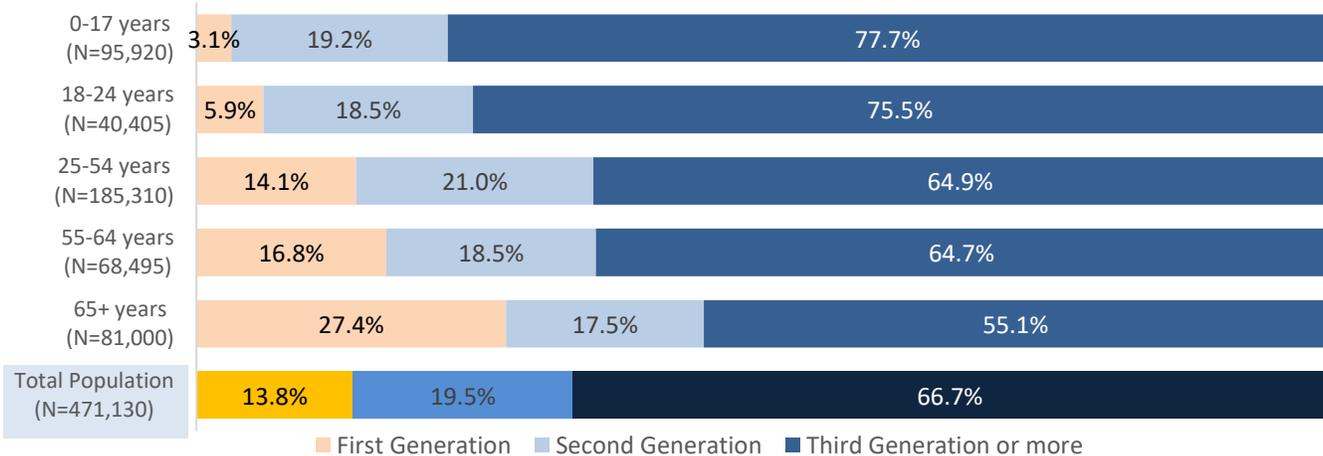

Figure 11: Distribution of Total Population by Generation Status in Simcoe County, 2016

The majority of immigrants arrive in Canada in their early adult years and generally have children once they have settled. First- and second-generation children of immigrants contribute to the renewal of the population and to the diversity of Canadian population (Statistics Canada, 2017). According to the 2016 Census, Simcoe County had 21,345 children under 17 years old who were foreign-born (first generation) or had at least one foreign-born parent (second generation), representing 22.3% of the total children.

In some ways, children with an immigrant background help build bridges between adult immigrants who have settled in Simcoe County and the rest of the population. On the one hand, these children, who were born in Canada or immigrated to the country at a young age, learn the values, social norms, and official languages of their host country through their school, friends, and neighborhood. On the other, they are familiar with the values and specific cultural practices of their parents' country of origin, not only through their family and cultural community, but also through their own experience in their country of origin. Therefore, with a dual cultural background, these children grow up, continue studying, and eventually join the Canadian labour market (Statistics Canada, 2018).

Figure 12: Distribution of the Population by Generation Status and Age Category in Simcoe County, 2016

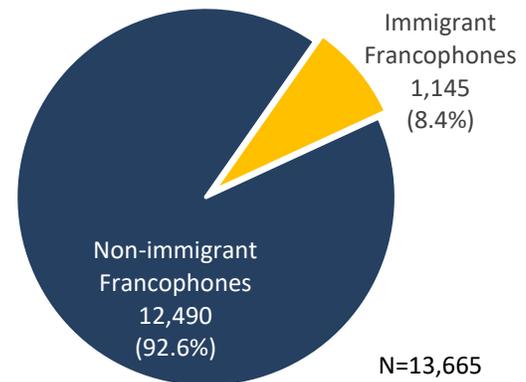

Language

Francophones

In June 2009, The Ontario government adopted the new Inclusive Definition of Francophone (IDF). In addition to people whose mother tongue is French, the new definition includes those whose mother tongue is neither English nor French but who have a knowledge of French and speak French at home (Office of the French Language Services Commissioner, 2017).

According to Statistic Canada's 2016 Census, immigrants represented a large proportion of the Francophone population in Simcoe County. In 2016, 1,145 Francophone immigrants¹³ made up 8.4% of the Francophone population, and rose from 815 in 2006 (+40.5%). *For the detailed information, please refer to the [Map 2: Proportion of Francophone immigrants by the Francophone population by municipality in Simcoe County, 2016](#) (page 20), and the [Appendix 15: Francophone Population for the Immigrant Population by Municipality in Simcoe County, 2016](#) (page 83).*

Figure 13: Francophones by Immigrant Status in Simcoe County, 2016

Source: 2016 Census, Target Group Profile of the Francophone population, Community Data Program (distributor).

Ontario's 2012 Ontario Immigration Strategy established a 5% target for Francophone immigration, while the Government of Canada is committed to increasing the proportion of Francophone economic immigrants in Francophone minority communities (FCM) to more than 4% by 2018 (The Assemblée de la francophonie de l'Ontario (AFO), 2017). The Provincial government released a report [Group of Experts on Francophone Immigration 2015-2016](#) in November 2016, which included 13 recommendations on how to achieve the 5% target for Francophone immigration.

Table 3: Francophone Immigrants by Period of Immigration in Simcoe County, 2016

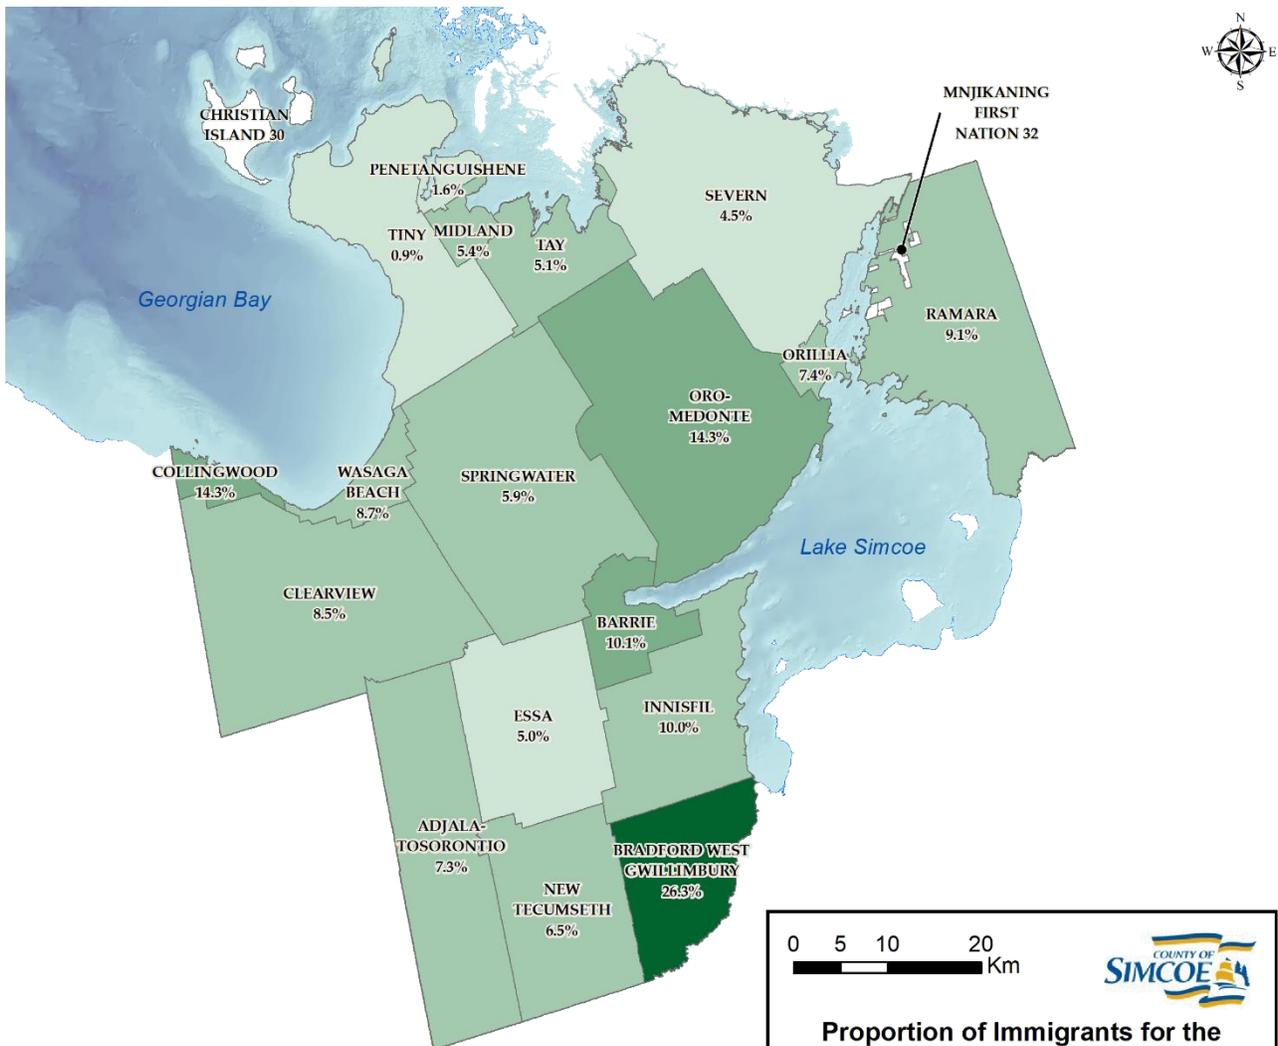

Period of Immigration	Total Immigrants	Francophone Immigrants	% of the Total Immigrants
Before 1981	31,260	410	1.3%
1981 to 1990	7,905	145	1.8%
1991 to 2000	8,990	160	1.8%
2001 to 2010	9,340	300	3.2%
2011 to 2016	4,115	120	2.9%
Immigrants	61,605	1,145	1.9%

Knowledge of Official Languages

The ability of immigrants to speak one of the official languages is considered an important condition for their full participation in Canadian society¹⁴. The 2016 Census provides further insight into the language profile of immigrants in Canada and their integration into the country's official language populations (Statistics Canada, 2018).

English and French are the languages of convergence and integration into Canadian society. In 2016, 97.1% (59,845) of immigrants were able to conduct a conversation in English and/or in French. 92.5% (57,005) of immigrants had English only knowledge of the official language, compared with 0.1% (75) for French only and 4.5% (2,765) for both English and French. *For the detailed information, please refer to the [Appendix 12: Knowledge of Official Language for the Immigrant Population by Municipality in Simcoe County, 2016](#) (page 75).*

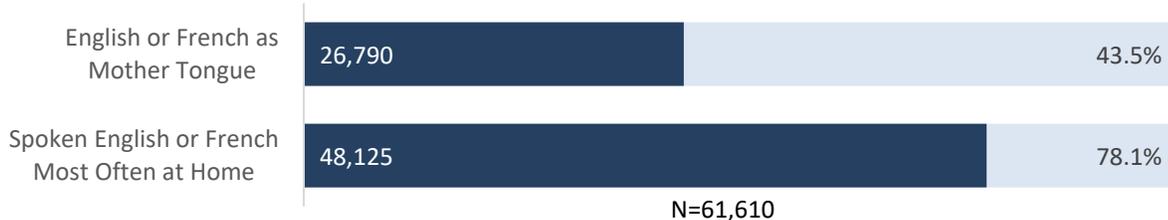

Figure 14: Immigrants by the Knowledge of Official Languages in Simcoe County, 2016

Source: 2016 Census, *Target group profile of the population by immigration and citizenship status*, Community Data Program (distributor).

People with a non-official mother tongue who use a language other than their mother tongue at home usually adopt English or French as their main language or as a secondary language. Data from the 2016 Census showed more immigrants spoke English or French most often at home compared to immigrants who having either language as a month tongue. In Simcoe County, 43.5% (26,790) of immigrants reported English or French as their mother tongue, while 78.1% (48,130) or nearly twice the number, spoke English or French most often at home.

Figure 15: Proportion of Immigrants Who Speak English or French at Home with Non-Official Language Mother Tongue in Simcoe County, 2016

Source: 2016 Census, *Target group profile of the population by immigration and citizenship status*, Community Data Program (distributor).

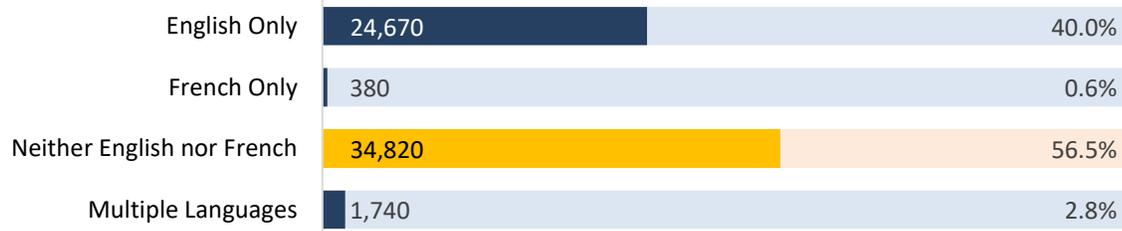

¹⁴ **Knowledge of official languages** refers to whether the person can conduct a conversation in English only, French only, in both languages or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home. For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the [Languages Reference Guide, Census of Population, 2016](#). Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.

Mother Tongue

Overall, Statistics Canada identified about 200 languages for the 2016 Census. In Simcoe County, Statistics Canada has identified approximately 112 mother tongues¹⁵ for immigrants. This is a conservative estimate given the exclusion of some languages and dialects that are suppressed due to sampling purposes (City of Toronto, 2017).

In 2016, 25,050 immigrants reported English or French as their mother tongue (single responses), representing 40.7% of the total immigrant population in Simcoe County. In Simcoe County, 56.5% (34,820) of immigrants were *Allophones* (people with a mother tongue other than English or French). An additional 2.8% (1,740) of immigrants identified official language(s) and a non-official language as their multiple mother tongues. *For the detailed information, please refer to the [Appendix 13: Mother Tongue \(Non-Official Language\) for the Immigrant Population Excluding Institutional Residents by Municipality in Simcoe County, 2016](#) (page 77).*

Figure 16: Distribution of Mother Tongue for Immigrants in Simcoe County, 2016

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

N=61,610

Among the 61,610 immigrants in Simcoe County, the most common non-official mother tongues were Portuguese, German, and Italian. Among the 4,110 recent immigrants, Tagalog (Pilipino, Filipino), Mandarin, and Russian were the most-reported non-official mother tongues. The proportion of immigrants with English or French as their mother tongue has decreased over the periods of immigration, from 43.5% for all immigrants to 28.1% for recent immigrants (2011-2016).

Table 4: The Most Common Mother Tongue (Single Responses) for Immigrants and Recent Immigrants in Simcoe County, 2016

Immigrants (N=59,865)			Recent Immigrants (N=3,985)		
Mother Tongue (Non-Official Languages)	#	% of Total Immigrants	Mother Tongue (Non-Official Languages)	#	% of Total Recent Immigrants
Portuguese	3,480	5.8%	Tagalog (Pilipino, Filipino)	355	8.9%
German	3,390	5.7%	Mandarin ¹⁶	275	6.9%
Italian	3,360	5.6%	Russian	260	6.5%
Spanish	2,825	4.7%	Spanish	245	6.1%
Polish	2,375	4.0%	Portuguese	130	3.3%

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

¹⁵ **Mother tongue** refers to the first language learned at home in childhood and still understood by the person at the time the data was collected.

¹⁶ The increase of *Mandarin* and *Cantonese* is due in large part to changes to data collection. New instructions in the electronic questionnaire, asking respondents to indicate the Chinese language spoken at home or that was first learned as a child (mother tongue), as applicable, resulted in a sharp increase in certain Chinese languages, particularly Mandarin and Cantonese.

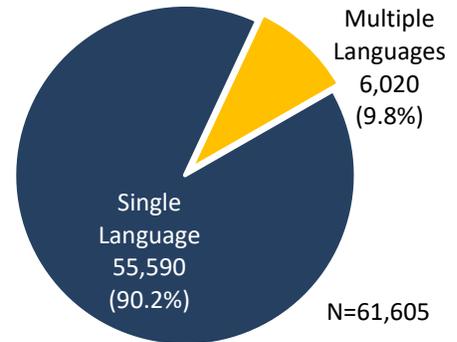

Language Spoken Most Often at Home

The 2016 Census showed that English and French remained the language spoken most often at home¹⁷. In Simcoe County, 78.1% (48,125) of immigrants spoke English or French most often at home (both single and multiple responses), which rose from 42,175 in 2006 to 48,125 in 2016 (+14.1%). *The detailed information, please refer to the [Appendix 14: Language Spoken Most Often at Home for the Immigrant Population Excluding Institutional Residents by Municipality in Simcoe County, 2016](#) (page 80).*

In Simcoe County, the proportion of residents who speak more than one language at home was higher in immigrants (9.7% or 6,015) than the total population (2.1% or 9,845).

Approximately 71 different languages were reported by immigrants as the language spoken most often at home in Simcoe County. Portuguese, Spanish, and Russian were the three most common non-official languages spoken by immigrants at home.

Figure 17: Language Spoken Most Often at Home for Immigrants in Simcoe County, 2016

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

Table 5: Immigrant Language¹⁸ Spoken Most Often at Home (Single Language) for Immigrants and Recent Immigrants in Simcoe County, 2016

Immigrants (N=55,590)			Recent Immigrants (N=3,600)		
Immigrant Languages	#	% of Total Immigrants	Immigrant Languages	#	% of Total Recent Immigrants
Portuguese	1,375	2.5%	Russian	220	6.1%
Spanish	1,265	2.3%	Mandarin	220	6.1%
Russian	1,115	2.0%	Spanish	165	4.6%
Italian	1,080	1.9%	Persian (Farsi)	105	2.9%
Polish	1,025	1.8%	Portuguese	100	2.8%

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

¹⁷ **Language spoken most often at home** refers to the language the person speaks most often at home at the time of data collection. A person can report more than one language as 'spoken most often at home' if the languages are spoken equally often. For a person who lives alone, the language spoken most often at home is the language in which he or she feels most comfortable. For a child who has not yet learned to speak, this is the language spoken most often to the child at home. Where two languages are spoken to the child, the language spoken most often at home is the language spoken most often. If both languages are used equally often, then both languages are included here. For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the [Languages Reference Guide, Census of Population, 2016](#). Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.

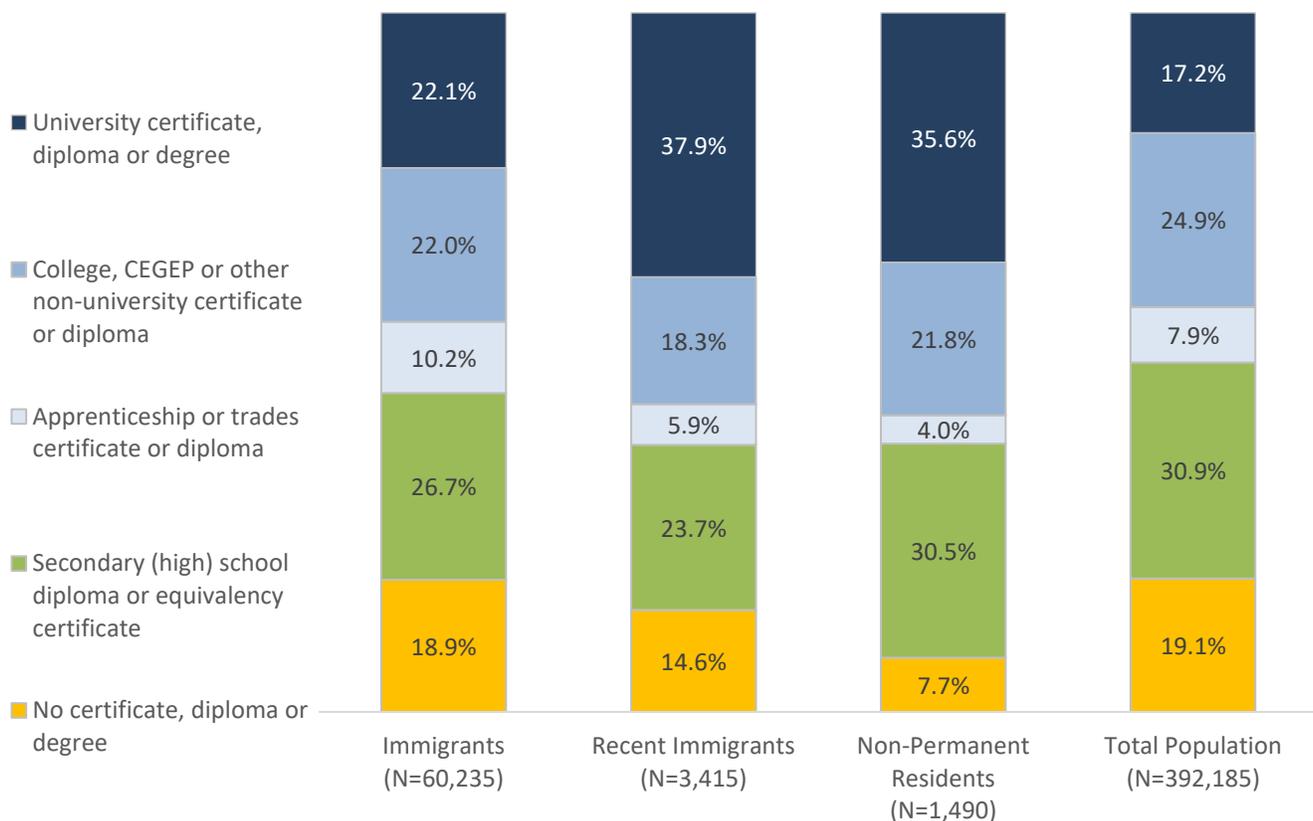

¹⁸ **Immigrant language** refers to a language (other than English and French, the country's official languages) whose existence in Canada is originally due to immigration after English and French colonization. This term excludes Aboriginal languages and sign languages, in addition to English and French. It must not be associated with the concept of the "language of immigrants."

Education

Immigrants contribute to Canada's economy by bringing their skills and high levels of educational attainment. Canada's immigration system highly values education. In recent years, new programs have made it easier for international students who have completed their postsecondary education in Canada to immigrate to the Country (Statistics Canada, 2017).

As of the 2016 Census, 22.1% (13,330) of immigrants had a university degree as their highest level of educational attainment¹⁹, in contrast, 17.2% (67,310) of the total population earned a university degree. Recent immigrants had the highest proportion (37.9%, or 1,295) of university education. *For the detailed information, please refer to the [Appendix 16: Highest Certificate, Diploma or Degree for the Immigrant Population by Municipality in Simcoe County, 2016](#) (page 84).*

Figure 18: The Highest Certificate, Diploma or Degree for Immigrants Aged 15 Years and Over in Simcoe County, 2016

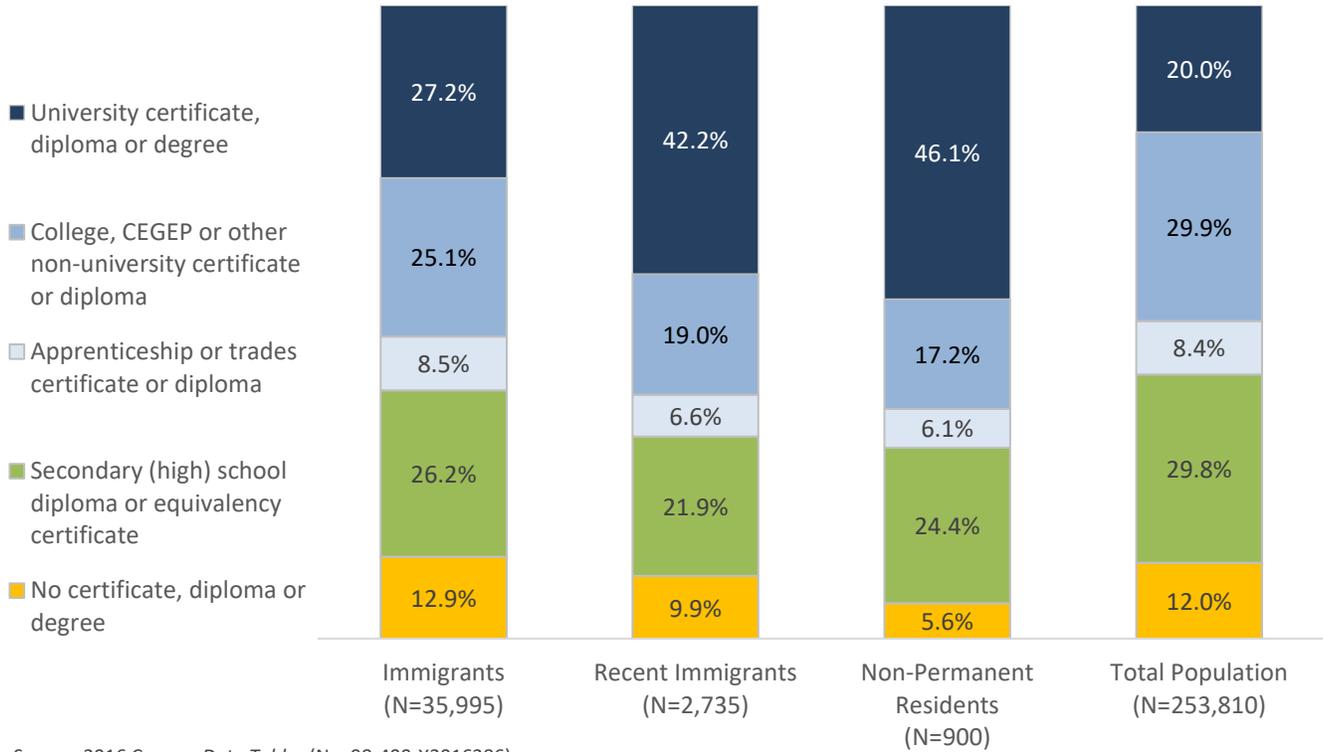

Source: 2016 Census, Data Tables (No. 98-400-X2016286)

¹⁹ **Highest certificate, diploma or degree** is the classification used in the Census to measure the broader concept of 'Educational attainment.' This variable refers to the highest level of education that a person has successfully completed and is derived from the educational qualifications questions, which asked for all certificates, diplomas and degrees to be reported.

²⁰ **Secondary (high) school diploma or equivalency certificate** includes only people who have this as their highest educational qualification. It excludes persons with a postsecondary certificate, diploma or degree.

In Simcoe County, 60.8% (21,855) of Immigrants aged 25-64 years had completed some form of postsecondary education, slightly higher than the proportion of the total population (58.3%, or 147,850) aged 25-64 years. Non-permanent residents aged 25-64 years were especially well-educated, with 69.4% (625) having a postsecondary's degree.

Figure 19: The Highest Certificate, Diploma or Degree for Immigrants Aged 25 to 64 Years in Simcoe County, 2016

Source: 2016 Census, Data Tables (No. 98-400-X2016286)

Major Field of Study - Based on the Classification of Instructional Programs (CIP) 2016

With an aging Canadian population and growing demand for knowledge and skills to meet the needs of the labour market, postsecondary education is critical to a prosperous future for Canada. In Simcoe County, among the 32,760 immigrants who were postsecondary credential holders, the most common major field of study was 'business, management, marketing, and related support services', followed by 'health professions and related programs' and 'engineering'²¹.

Immigrants make up a high proportion of the total population who completed their engineering degree. In Simcoe County, 4,700 residents aged 15 years and over completed a postsecondary degree in engineering, and 42.4% (1,995) were immigrants. The high educational attainment of immigrants to Canada is well-documented, as are the challenges faced by immigrants with educational credentials from outside Canada. It is likely that immigrants with a degree in engineering from outside Canada will complete a graduate degree in engineering after arriving in Canada in order to earn Canadian educational credentials that are recognized by employers (Statistics Canada, 2018).

Table 6: The Most Common Major Field of Study (Classification of Instructional Program (CIP) 2016) by Immigrant Status in Simcoe County, 2016

Total Population (N=196,160)		Immigrants (N=32,760)		Recent Immigrants (N=2,110)		Non-Permanent Residents (N=920)	
Major Field of Study (CIP 2016)	#	Rank	#	Rank	#	Rank	#
Architecture, engineering, and related technologies	42,385	1	8,690	1	1,310	2	215
Business, management and public administration	36,695	2	6,760	2	460	1	260
Health and related fields	34,510	3	4,830	3	440	3	200
Social and behavioural sciences and law	23,460	4	3,150	4	390	5	70
Personal, protective and transportation services	16,910	5	2,305				
Education				5	140		
Mathematics, computer and information sciences						4	75

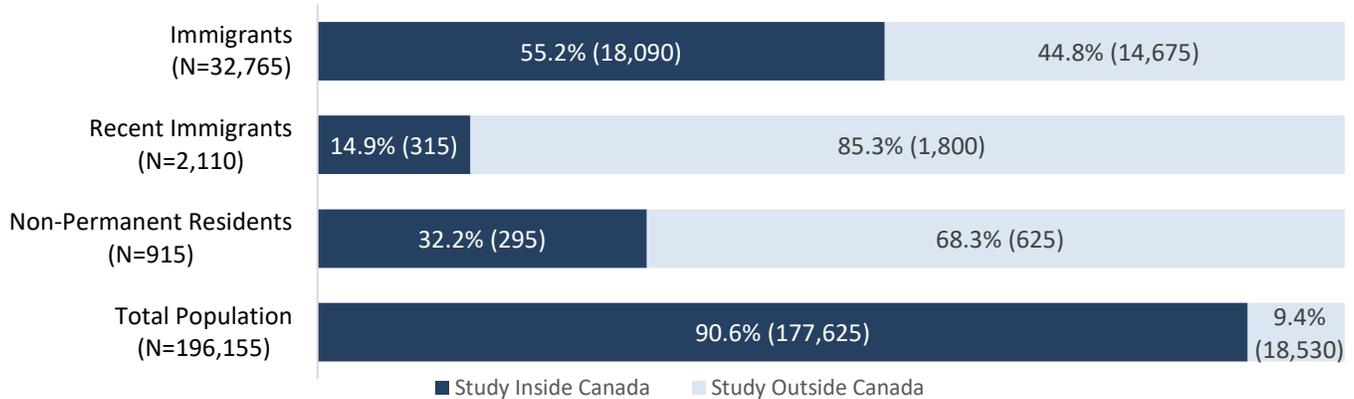

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

²¹ **Major field of study** refers to the predominant discipline or area of learning or training of a person's highest completed postsecondary certificate, diploma or degree, classified according to the Classification of Instructional Programs (CIP) Canada 2016. For more information on the CIP classification, see the [Classification of Instructional Programs, Canada 2016](#).

Location of Study

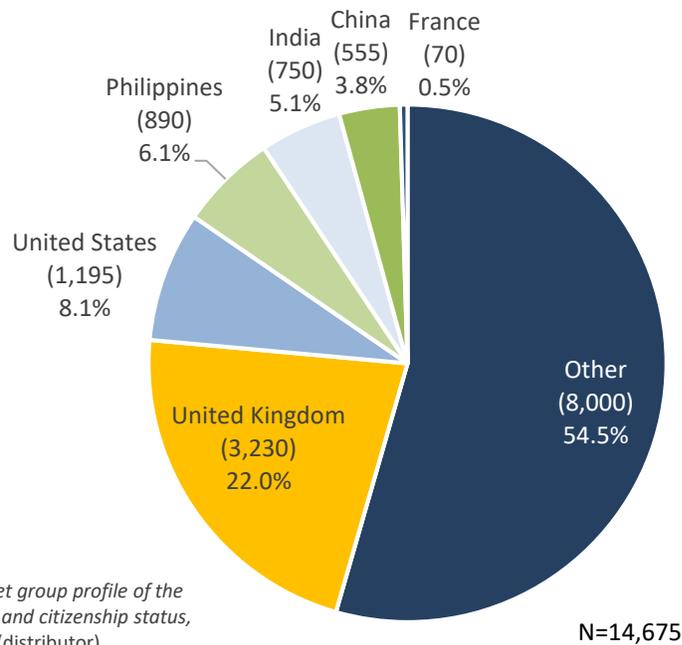

In Simcoe County, among 32,765 post-secondary certificate, diploma or degree holders for the immigrant population (aged 15 years and over), 55.2% (18,090) obtained their credential inside of Canada²². Individual countries of study outside of Canada are broadly distributed; the highest proportion is the United Kingdom at 22.0% (3,230). *For the detailed information, please refer to the [Appendix 17: Location of Study for the Immigrant Population by Municipality in Simcoe County, 2016](#) (page 86).*

Figure 20: Location of Study by Immigrant Status for the Population Aged 15 Years and Over in Simcoe County, 2016

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

Figure 21: Location of Study Outside Canada²³ for Immigrants Aged 15 Years and Over in Simcoe County, 2016

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

²² **Location of study** refers to the location of the institution granting the certificate, diploma or degree, not the location of the person at the time he or she obtained the qualification or was attending the institution. The geographic location is specified according to boundaries current at the time the data are collected, not the boundaries at the time of study.

²³ Refers to all locations of study outside Canada, including the six locations outside Canada most often reported at the national level. These will not necessarily be the top six countries for other geographies.

Labour Force

The contribution of immigrants to the Canadian labour market is an important component of strategies to offset the impact of population aging, which might otherwise lead to a shrinking pool of workers and labour shortages. Many immigrants are admitted to Canada based on their skills and education (Statistics Canada, 2017).

In 2016, 13.2% of Simcoe's labour force was comprised of immigrants (32,875) and non-permanent residents (930), while 86.8% (222,960) was Canadian-born²⁴. Between 2006 and 2016 the number of employed immigrants living in Simcoe County increased by more than 4,750 (+18.1%). Over the same ten-year period, the number of employed total population increased by +21,400 (+9.8%). *For the detailed information, please refer to the [Appendix 18: Labour Force Status for the Immigrant Population by Municipality in Simcoe County, 2006-2016](#) (page 88).*

Labour force activity for the week of May 1st to 7th, 2016, recorded by the 2016 Census shows that immigrants (51.5%) had lower employment rates than the total population (60.9%) in Simcoe County. Recent immigrants, who arrived in Canada between 2011 and 2016, had the highest unemployment rate (10.4%) compared to immigrants (5.7%) and the total population (6.9%).

Immigrant workers are, on average, better-educated than their Canadian-born counterparts. In spite of this, they tend to have less favourable labour market outcomes than Canadian-born workers (Statistics Canada, 2018). *For the detailed information, please refer to the [Appendix 19: Work Activity for the Immigrant Population by Municipality in Simcoe County, 2015](#) (page 90).*

Table 7: Labour Force Status by Immigrant Status for the Population Aged 15 Years and Over in Simcoe County, 2016

	Immigrants		Recent Immigrants		Non-Permanent Residents		Total Population	
	2016	2006	2016	2006	2016	2006	2016	2006

- b) 2006 Census, *Data Tables* (No. 97-560-x2006026)

²⁴ **Labour force status** refers to whether a person aged 15 years and over was employed, unemployed or not in the labour force during the week of Sunday, May 1 to Saturday, May 7, 2016. In the past, this variable was called *Labour force activity*.

²⁵ **Not in the labour force** refers to persons who, during the week of Sunday, May 1 to Saturday, May 7, 2016, were neither employed nor unemployed.

Occupation - Based on the National Occupational Classification (NOC) 2016

In 2016, the most common occupation²⁶ (National Occupational Classification (NOC) 2016) for immigrants (15 years and over) was 'sales and service occupations', accounting for 22.2% of immigrants in Simcoe County. 'Trades, transport and equipment operators and related occupations' was second at 19.2%, followed by 'business, finance, and administration occupations' (13.4%).

The occupation with the largest absolute share of total employed recent immigrants in Simcoe County is 'sales and service occupations' with 27.6%. This is followed by 'trades, transport and equipment operators and related occupations' (17.7%) and 'health occupations' (9.4%).

Table 8: The Most Common Occupation (National Occupational Classification (NOC) 2016) by Immigrant Status for Population Aged 15 Years and Over in Simcoe County, 2016

Total Population (N=251,960)			Immigrants (N=32,225)			Recent Immigrants (N=2,230)		
Occupation Categories (NOC 2016)	#	% of Total Population	Rank	#	% of Total Immigrants	Rank	#	% of Recent Immigrants
Sales and service occupations	61,700	24.5%	1	7,170	22.2%	1	615	27.6%
Trades, transport and equipment operators and related occupations	44,955	17.8%	2	6,185	19.2%	2	395	17.7%

Occupations in education, law and social, community and government services	28,855	11.5%	5	2,850	8.8%			
Management occupations	27,795	11.0%	4	4,235	13.1%	4	205	9.2%
Health occupations						3	210	9.4%

Source: 2016 Census, *Target group profile of the population by immigration and citizenship status*, Community Data Program (distributor).

²⁶ **Occupation** refers to the kind of work performed by persons aged 15 years and over as determined by their kind of work and the description of the main activities in their job. The occupation data are produced according to the NOC 2016. Includes the experienced labour force which refers to persons aged 15 years and over who, during the week of Sunday, May 1 to Saturday, May 7, 2016, were employed and the unemployed who had last worked for pay or in self-employment in either 2015 or 2016.

Industry - Based on the North American Industry Classification System (NAICS) 2012

In 2016, employed Simcoe immigrants worked across a wide variety of industries²⁷. Among the 32,230 immigrants, aged 15 years and over, who were employed and the unemployed, who had last worked for pay or in self-employment in either 2015 or 2016 (Statistics Canada, 2017), the most common industries by employment were 'manufacturing' (13.5%), 'health care and social assistance' (11.4%), and 'retail trade' (11.1%).

Table 9: The Most Common Industry (North American Industry Classification System (NAICS) 2012) by Immigrant Status for Population Aged 15 Years and Over in Simcoe County, 2016

Total Population (N=251,960)			Immigrants (N=32,230)			Recent Immigrants (N=2,230)

²⁷ **Industry** refers to the general nature of the business carried out in the establishment where the person worked. The data are produced according to the NAICS 2012. Includes the experienced labour force which refers to persons aged 15 years and over who, during the week of Sunday, May 1 to Saturday, May 7, 2016, were employed and the unemployed who had last worked for pay or in self-employment in either 2015 or 2016.

Place of Work

In 2016, 55.1% (19,535) immigrant residents worked locally in Simcoe County, compared to 64.8% (177,830) of the total population as a whole. *For the detailed information, please refer to the [Appendix 20: Place of Work Status for the Immigrant Population in the Employed Labour Force by Municipality in Simcoe County, 2016](#) (page 92).*

Income

Individual Income²⁸

For the first time, the Census of Population gathered income data solely from administrative sources, rather than asking Census participants to self-report their income levels. The income data for the 2016 Census covers the full year prior to the Census, so the reference period for this data is the year 2015.

In 2015, the median total income (before tax)²⁹ for immigrants (aged 15 years and over) in Simcoe County was \$31,612. Among the total population in Simcoe County, the median individual income (before tax) was \$34,036. *For the detailed information, please refer to the [Appendix 21: Income of Individuals for the Immigrant Population by Municipality in Simcoe County, 2015](#) (page 93).*

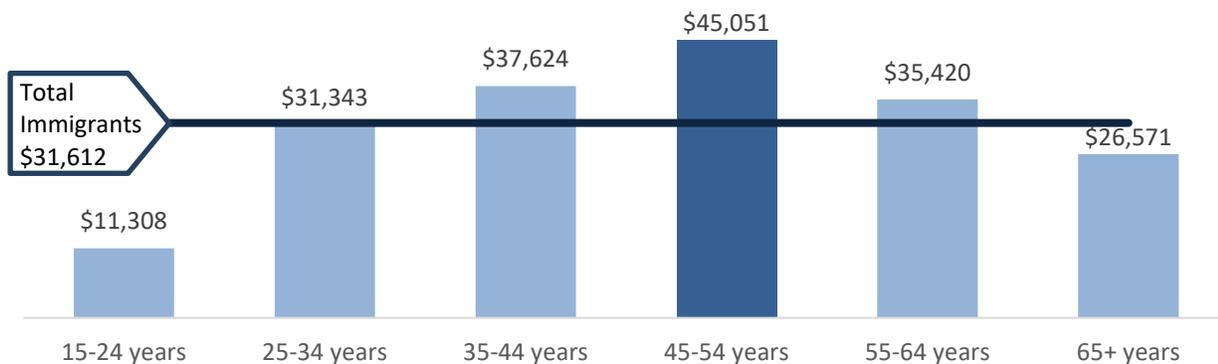

Figure 22: Median Total Income in 2015 for the Total Income Recipients Aged 15 Years and Over in Simcoe County

Source: 2016 Census, Data Tables (No. 99-014-X2011040)

There were remarkable differences in the median total income (before tax) by age category. In 2015, the highest median total income among age groups was recorded for immigrants aged 45-54 years at \$45,051 in Simcoe County. Young immigrants (15-24 years) had the lowest median total income (\$11,308).

Figure 23: Median Total Income in 2015 for Immigrant Recipients by Age Category in Simcoe County

Source: 2016 Census, Data Tables (No. 99-014-X2011040)

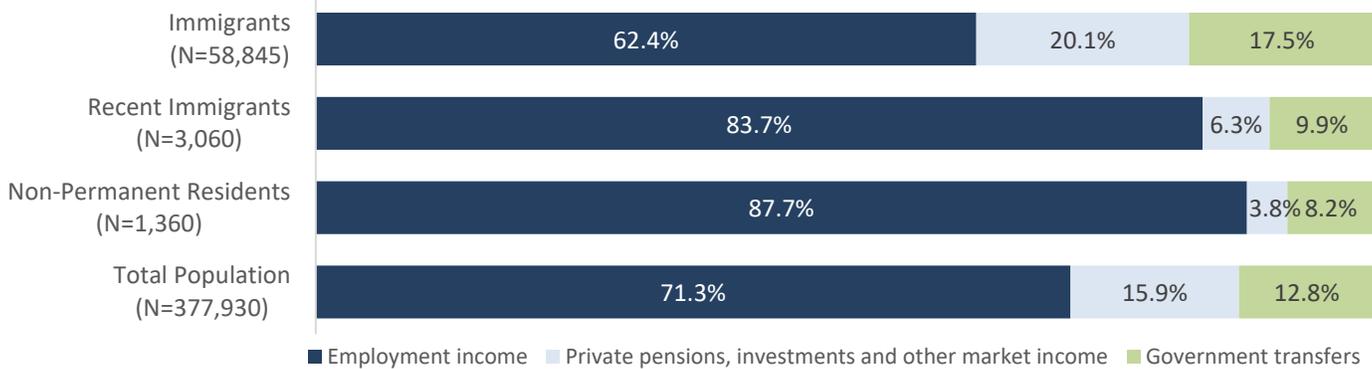

²⁸ **Total income** - The sum of certain incomes (in cash and, in some circumstances, in kind) of the statistical unit during a specified reference period. In the context of persons, total income refers to receipts from certain sources, before income taxes and deductions, during a specified reference period.

For the 2016 Census, the reference period is the calendar year 2015 for all income variables.

²⁹ **Median income** - The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median. Median incomes of individuals are calculated for those with income (positive or negative).

In 2015, 62.4% of the total income of immigrants (15 years and over) came from employment income in Simcoe County. Private pensions, investment income, and other market income together accounted for 20.1% of total income. Government transfers made up 17.5% of total income.

Figure 24: Composition of Total Income among Total Income Recipient Aged 15 Years and Over in Simcoe County, 2015

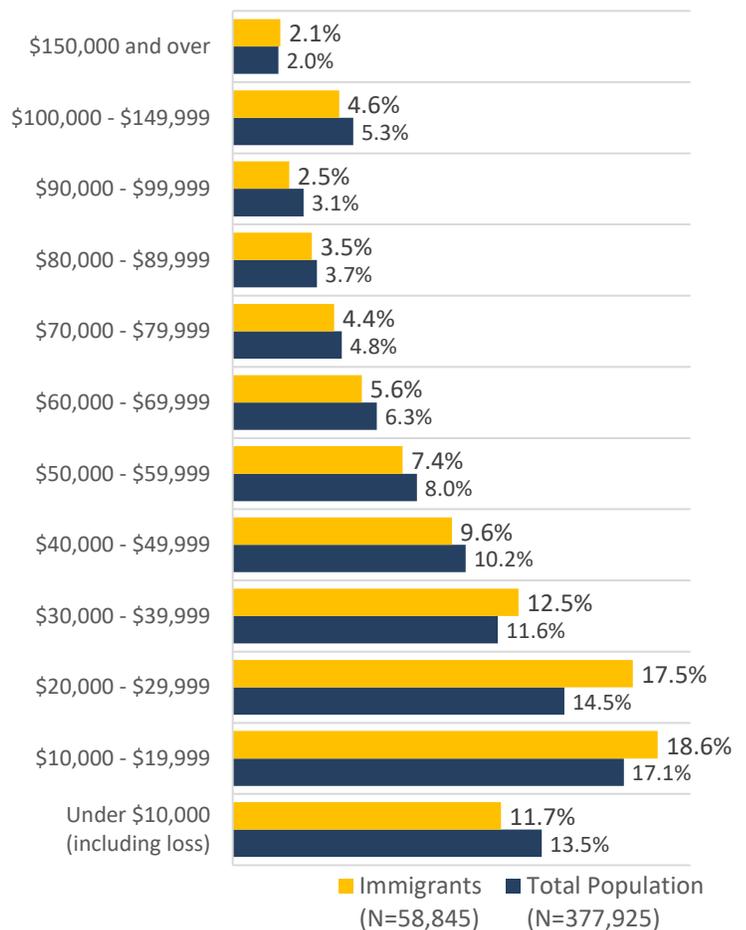

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

In both immigrants and the total population, the highest number of individuals by \$10,000 increments were in the group with incomes between \$10,000 and \$19,999. In Simcoe County, 11.7% of immigrants aged 15 years and over (with income) had incomes under \$10,000 (including loss), compared to 13.5% in the total population (15 years and over with income).

In 2015, the highest median total income for immigrants in Simcoe County was observed in the municipalities: Springwater (\$42,449), New Tecumseth (\$36,787) and Oro-Medonte (\$35,775). For the detailed information, please refer to the [Appendix 21: Income of Individuals for the Immigrant Population by Municipality in Simcoe County, 2015](#) (page 93).

Figure 25: Distribution of Individuals with Income for Immigrants and Total Population Aged 15 Years and Over in Simcoe County, 2015

Source: 2016 Census, Data Tables (No. 99-014-X2011040)

Low Income Status³⁰

The Low-income measure, after tax (LIM-AT), is an internationally used measure of low income. The concept underlying the LIM-AT is that a household has low income if its income is less than half of the median income of all households in Canada. The threshold for LIM-AT in 2015 is \$22,133 for a one-person household, \$31,301 for a two-persons household, and \$ 38,335 for a three-persons household.

In 2015, there were 7,650 immigrants in Simcoe County living in low-income households based on the Statistics Canada's Low Income Measure After Tax (LIM-AT). The prevalence of low-income (LIM-AT)³¹ for immigrants was 12.4%, compared to 11.4% in the total population in Simcoe County. The prevalence of low-income (LIM-AT) for recent immigrants was higher (22.7%) than immigrants and the total population. *For the detailed information, please refer to the [Appendix 22: Low-income Status Based on the Low-income Measure, After Tax \(LIM-AT\) for the Immigrant Population by Municipality in Simcoe County, 2015](#) (page 95).*

Table 11: Low-Income Status in 2015 for Immigrants Based on the Low-Income Measure, After Tax (LIM-AT) in Simcoe County

Age Category	Immigrants (N=61,590)		Recent Immigrants (N=4,110)		Total Population (N=469,605)

18-64 years	4,925	13.1%	610	20.5%	31,485	10.7%
65+ years	2,220	10.1%	60	20.3%	7,800	9.6%
Individuals in low income based on the LIM-AT	7,650	12.4%	930	22.7%	53,580	11.4%

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

In Simcoe County, children (aged 5 years and under) had a significantly higher rate of low-income, 39.4% for immigrant children compared to 16.0% for the total children in 2015.

Within Simcoe County, municipalities with the highest prevalence of low income can be found in Barrie (14.6%), Collingwood (14.5%), and Wasaga Beach (14.2%). Municipalities with the lowest rates of low income can be found in Penetanguishene (5.4%), Springwater (5.5%), and Adjala-Tosorontio (6.2%). *For the detailed information, please refer to the [Map 3: Prevalence of low income \(LIM-AT\) for immigrants by municipality in Simcoe County, 2016](#) (page 35).*

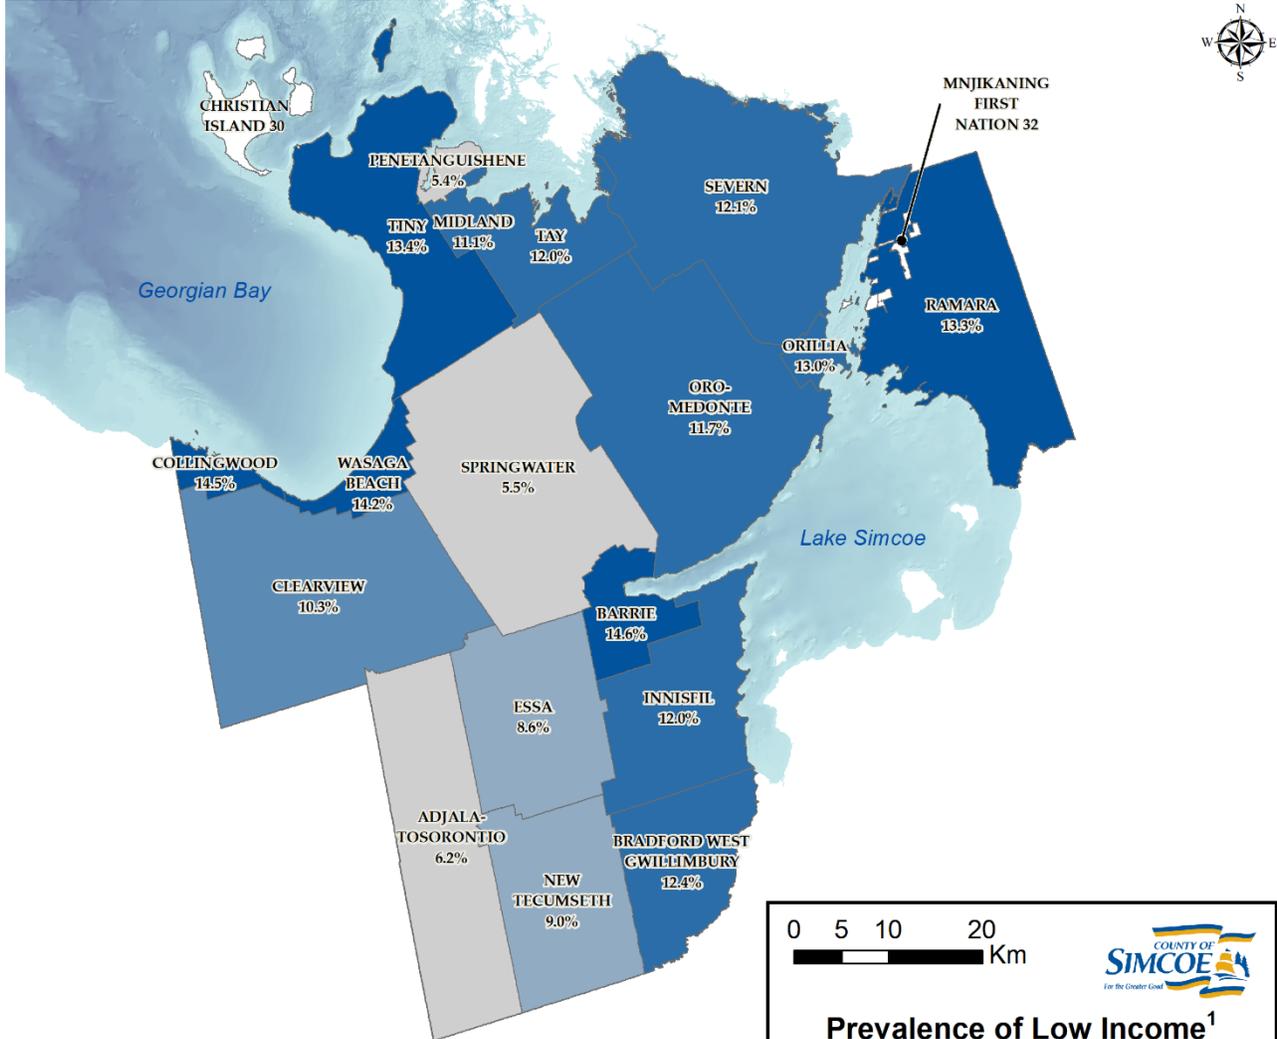

³⁰ **Low-income status** - The income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income.

For the 2016 Census, the reference period is the calendar year 2015 for all income variables.

Low-income statistics are reported for the entire population in private households where low-income concepts are applicable. Statistics Canada has clearly and consistently emphasized that *the low-income lines are not measures of poverty.*

³¹ **Prevalence of low income** - Percentage of persons living in families or households below various low-income lines.

Mobility Status – Based on Place of Residence

From May 2015 to May 2016, 5,795 immigrants moved into Simcoe County during the one-year period, which accounted for 9.4% of the total immigrant population³². 590 immigrants moved from outside of Canada, and 5,025 immigrants were from Ontario, and 185 were from other provinces.

Figure 26: Mobility Status (Place of Residence between **May 2015 and May 2016**) for immigrants in Simcoe County, 2016

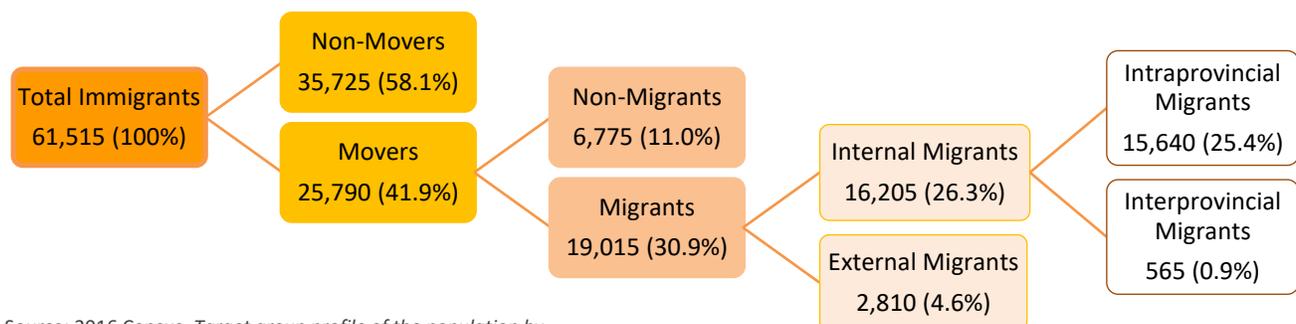

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

During the five-year period prior to 2016, Simcoe County attracted 2,810 immigrants from outside Canada, 16,205 immigrants from the rest of Ontario and other parts of the country. This shows that the greatest number of immigrants moved to Simcoe County from another part of Ontario.

The [Mobility & Migration Reference Guide](#) notes that estimates of internal migrants based on the 2016 Census are, in general, lower than the ones derived from administrative data (Statistics Canada, 2017). These potential disparities suggest that there may be higher levels of internal migration to Simcoe County than currently reported in the 2016 Census. Similarly, there could also be higher levels of mobility within Ontario than indicated by the 2016 Census results. Further study will be required regarding the components of the municipality's population change to examine mobility and migration in greater detail.

Figure 27: Mobility Status (Place of Residence between **May 2011 and May 2016**) for Immigrants in Simcoe County, 2016

Source: 2016 Census, Target group profile of the population by immigration and citizenship status, Community Data Program (distributor).

³² **Mobility status** refers to the status of a person with regard to the place of residence on the reference day, May 10, 2016, in relation to the place of residence on the same date one (or five) year(s) earlier at the provincial level. Persons who have not moved are referred to as **non-movers** and persons who have moved from one residence to another are referred to as **movers**. Movers include non-migrants and migrants. **Non-migrants** are persons who did move but remained in the same city, town, township, village or Indian reserve. **Migrants** include internal migrants, who moved to a different city, town, township, village or Indian reserve within Canada. **External migrants** include persons who lived outside Canada at the earlier reference date.

Glossary

A

Admission category refers to the name of the immigration program or group of programs under which an immigrant has been granted for the first time the right to live in Canada permanently by immigration authorities.

- Persons in private households who are, or who have ever been, landed immigrants or permanent residents since 1980.
- In the 2016 Census of Population, data on admission category are available for immigrants who landed in Canada between January 1st, 1980 and May 10th, 2016.

Asylum seekers are persons who claimed refugee status upon or after their arrival to Canada, but had not been granted permanent resident status at the time of the Census. Asylum seekers are included in the non-permanent resident population and not in the immigrant population.

C

Children with an immigrant background are defined by *generation status*, which was derived from questions on the respondent's place of birth and the parents' place of birth. Children with an immigrant background comprise three groups: foreign-born children, Canadian-born children with two foreign-born parents, and Canadian-born children with one Canadian-born parent and one foreign-born parent. The other children belong to the third generation or more: these children were born in Canada to two parents who were also born in Canada.

Citizenship refers to the country of citizenship of a person. A person may have more than one citizenship. A person may be stateless, that is, they may have no citizenship. Citizenship can be by birth or naturalization.

Canada, by naturalization refers to the process by which an immigrant is granted citizenship of Canada, under the Citizenship Act.

Commuters refer to workers who must travel to get to work. These workers may have a specific work address or may be with no fixed workplace address.

E

Economic immigrant includes immigrants who have been selected for their ability to contribute to Canada's economy through their ability to meet labour market needs, to own and manage or to build a business, to make a substantial investment, to create their own employment or to meet specific provincial or territorial labour market needs.

Ethnic origin refers to the ethnic or cultural origins of the person's ancestors. An ancestor is usually more distant than a grandparent.

Employed refers to persons who, during the reference week:

- Did any work at all at a job or business, that is, paid work in the context of an employer-employee relationship, or self-employment. This also includes persons who did unpaid family work, which is defined as unpaid work contributing directly to the operation of a farm, business or professional practice owned and operated by a related member of the same household;
- Had a job but were not at work due to factors such as their own illness or disability, personal or family responsibilities, vacation or a labour dispute. This category excludes persons not at work because they were on layoff or between casual jobs, and those who did not then have a job (even if they had a job to start at a future date).

Employment income - All income received as wages, salaries and commissions from paid employment and net self-employment income from farm or non-farm unincorporated business and/or professional practice during the reference period.

F

Francophone (Inclusive Definition of Francophone (IDF)) includes not only people whose mother tongue is French but also individuals whose mother tongue is neither English nor French (allophones) but who have a particular knowledge of French as an official language and use it at home. Under the IDF, a Moroccan family, for instance, that speaks Arabic and French at home is considered Francophone.

Field of study refers to the discipline or area of learning/training associated with a particular course or programme of study.

- This variable refers to the predominant discipline or area of learning or training of a person's highest completed postsecondary certificate, diploma or degree, classified according to the Classification of Instructional Programs (CIP) Canada 2016.

First official language spoken is specified within the framework of the Official Languages Act. It refers to the first official language (i.e., English or French) spoken by the person.

- The **first official language spoken** variable was developed by Statistics Canada in 1989 at the request of the federal government to help estimate the potential demand for government services in either official language. Statistics Canada proposed two methods (methods I and II) to estimate first official language spoken. Method I was adopted in the Official Languages (Communications with and Services to the Public) Regulations. Under Method I, first official language spoken is derived successively from answers to the questions on knowledge of official languages, mother tongue and language spoken most often at home. For more information, see Population Estimates by First Official Language Spoken, Ottawa, Statistics Canada, Housing, Family and Social Statistics Division and Language Studies, 1989.
- The method used to derive the first official language spoken variable takes into account, first, the knowledge of official languages, second, the mother tongue, and third, the home language.

G

Generation status refers to whether or not the person or the person's parents were born in Canada.

- **First generation** includes persons who were born outside Canada. For the most part, these are people who are now, or once were, immigrants to Canada.
- **Second generation** includes persons who were born in Canada and had at least one parent born outside Canada. For the most part, these are the children of immigrants.
- **Third generation or more** includes persons who were born in Canada with both parents born in Canada.

Government transfers - All cash benefits received from federal, provincial, territorial or municipal governments during the reference period. It includes:

- Old Age Security pension, Guaranteed Income Supplement, Allowance or Allowance for the Survivor;
- retirement, disability and survivor benefits from Canada Pension Plan and Québec Pension Plan;
- benefits from Employment Insurance and Québec parental insurance plan;
- child benefits from federal and provincial programs;
- social assistance benefits;
- workers' compensation benefits;
- working income tax benefit;
- goods and services tax credit and harmonized sales tax credit;
- other income from government sources.

I

Immigrant language refers to a language (other than English and French, the country's official languages) whose existence in Canada is originally due to immigration after English and French colonization. This term excludes *Aboriginal languages* and *sign languages*, in addition to *English* and *French*. It must not be associated with the concept of the "language of immigrants."

Immigrant sponsored by family is an immigration admission category which includes immigrants who were sponsored by a Canadian citizen or permanent resident and were granted permanent resident status on the basis of their relationship either as the spouse, partner, parent, grandparent, child or other relative of this sponsor. The terms "family class" or "family reunification" are sometimes used to refer to this category.

Immigrant status refers to whether the person is a non-immigrant, an immigrant or a non-permanent resident in Canada.

- *Note:* For the 2016 Census, the immigrant population includes people having immigrated no later than May 10, 2016.

The **immigrant population** (or **foreign-born population**) is defined in the 2016 Census as persons who are, or who have been, landed immigrants or permanent residents in Canada. Such persons have been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this group.

Industry (based on the North American Industry Classification [NAICS] 2012) refers to a generally homogeneous group of economic producing units, primarily engaged in a specific set of activities. An activity is a particular method of combining goods and services inputs, labour and capital to produce one or more goods and/or services (products). In most cases, the activities that define an industry are homogeneous with respect to the production processes used.

Income refers to income from a variety of sources. The total income of an individual, household, or family is comprised of market income (employment income, investment income, private retirement income, etc.) and government transfers (all cash benefits received from federal, provincial, territorial or municipal governments).

K

Knowledge of official languages refers to whether the person can conduct a conversation in English only, French only, in both or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.

L

Labour force refers to persons who, during the reference week were either employed or unemployed. Labour force = Employed + Unemployed.

Location of residence five years ago of person refers to the person's usual place of residence five years prior to the reference day.

Location of residence one year ago refers to the person's usual place of residence one year prior to the reference day.

Location of study refers to the location of the institution granting the certificate, diploma or degree, not the location of the person at the time he or she obtained the qualification or was attending the institution. The geographic location is specified according to boundaries current at the time the data are collected, not the boundaries at the time of study.

Low Income refers to whether an individual, family, or household had an income below a specific low-income line. The low income line referenced throughout this background in the Low Income Measure After Tax (LIM-AT), as it is the statistic used most frequently and as a key indicator by Statistics Canada. The threshold of income varies based on the size of a household. For 2015, the LIM-AT threshold is \$22,133 for a one person household, \$31,301 for a two person household, and \$44,266 for a four person household. See the Census 2016: Income 4 of 13 Census Dictionary for the full range of LIM-AT thresholds: http://www12.statcan.gc.ca/census-recensement/2016/ref/dict/tab/t4_2-eng.cfm.

M

Market income - The sum of employment income (wages, salaries and commissions, net self-employment income from farm or non-farm unincorporated business and/or professional practice), investment income, private retirement income (retirement pensions, superannuation and annuities, including those from registered retirement savings plans [RRSPs] and registered retirement income funds [RRIFs]) and other money income from market sources during the reference period. It is equivalent to total income minus government transfers. It is also referred to as income before transfers and taxes.

Major field of study variable can be used either independently or in conjunction with the 'Highest certificate, diploma or degree' variable. When the latter is used with 'Major field of study,' it should be noted that different fields of study will be more common for different types of postsecondary qualifications. At the detailed program level, some programs are only offered by certain types of institutions.

- There was an explicit instruction in the questionnaire which instructed respondents to be as specific as possible in indicating a subfield or subcategory of specialization within a broad discipline or area of training.
- This variable is reported for persons aged 15 years and over in private households.
- This variable shows the 'Variant of CIP 2016 - Alternative primary groupings' CIP variant, with the hierarchy of the primary groupings and two-digit series. When a primary grouping contains more than one subseries from series '30. Multidisciplinary/interdisciplinary studies,' these subseries are grouped together. An exception is made for '30.01 Biological and physical sciences' due to its large size. For more information on the CIP classification, see the Classification of Instructional Programs, Canada 2016.
- For information on collection, classification and data quality for this variable, refer to the Education Reference Guide, Census of Population, 2016, Catalogue no. 98-500-X2016013.
- Certain series and their subcomponents are not used when coding major field of study for the Census. These are series 21, 32 to 37 and 53, which represent non-credit and personal improvement fields of study.

Median income - The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median. Note: Median is the measure of central tendency that is available for 100% of the population. Median incomes of individuals are calculated for those with income (positive or negative).

Mobility status, five years refers to the status of a person with regard to the place of residence on the reference day in relation to the place of residence on the same date five years earlier.

Mobility status, one year refers to the status of a person with regard to the place of residence on the reference day in relation to the place of residence on the same date one year earlier.

Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person. For a child who has not yet learned to speak, the mother tongue is the language spoken most often to this child at home. The child has two mother tongues only if both languages are spoken equally often so that the child learns both languages at the same time.

Multigenerational household refers to a household with at least three generations, namely grandparents, parents and children of the same family line living under the same roof.

Movers & Non-Movers: The County of Simcoe' population is composed of movers and non-movers. Persons who have not moved are referred to as non-movers and persons who have moved from one residence to another (within one year or five years of Census Day) are referred to as movers. Movers are Migrants and Non-Migrants. Non-Migrants are people who moved within the same city or town (for example, within the city of Barrie). Migrants are broken down into Internal Migrants and External Migrants. External migrants are people who came from another county to live in Canada. Internal Census 2016: Education, Labour, Journey to work, Language of work, Mobility and migration 11 of 40 Migrants are people who moved to a different Province in Canada, known as interprovincial migrants, and people who moved to a different city or town within the same Province, who are intraprovincial migrants.

N

Naturalization refers to the process by which an immigrant is granted citizenship in Canada under the Citizenship Act. Only immigrants who have met certain criteria such as residency, language and other requirements are eligible for Canadian citizenship by naturalization.

Non-permanent resident includes persons from another country who have a work or study permit or who are refugee claimants, and their family members sharing the same permit and living in Canada with them.

Not in the labour force refers to persons who, during the week of Sunday, May 1 to Saturday, May 7, 2016, were neither employed nor unemployed.

O

Other immigrant includes immigrants who were granted permanent resident status under a program that does not fall in the economic immigrants, the immigrants sponsored by family or the refugee categories.

Occupation (based on the National Occupational Classification [NOC] 2016) refers to the kind of work performed by persons during the reference week as determined by their kind of work and the description of the main activities in their job. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

P

Place of birth refers to the name of the geographic location where the person was born. The geographic location is specified according to geographic boundaries current at the time of data collection, not the geographic boundaries at the time of birth.

- In the 2016 Census of Population, the geographic location refers to the name of the province, territory or country in which the person was born. It refers to a province or territory if the person was born in Canada. It refers to a country if the person was born outside Canada.

Participation rate refers to the labour force in the week of Sunday, May 1 to Saturday, May 7, 2016, expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (age, sex, marital status, geographic area, etc.) is the total labour force in that group, expressed as a percentage of the total population in that group.

R

Recent immigrant refers to an immigrant who first obtained his or her landed immigrant or permanent resident status in the five years prior to a given Census. In the 2016 Census, the period is from January 1, 2011 to May 10, 2016.

Refugee includes immigrants who were granted permanent resident status on the basis of a well-founded fear of returning to their home country. This category includes persons who had a well-founded fear of persecution for reasons of race, religion, nationality, membership in particular social group or for political opinion (Geneva Convention refugees) as well as persons who had been seriously and personally affected by civil war or armed conflict, or have suffered a massive violation of human rights. Some refugees were in Canada when they applied for refugee protection for themselves and their family members (either with them in Canada or abroad). Others were abroad and were referred for resettlement to Canada by the United Nations Refugees Agency, another designated referral organization, or private sponsors.

S

Secondary (high) school diploma or equivalency certificate refers to whether or not a person has completed a secondary school or high school diploma, graduation certificate, or equivalency certificate. Secondary school (high school) diploma or graduation certificate includes academic or vocational high school diplomas or certificates as may be obtained by graduating from a secondary school. High school equivalency certificate includes the successful completion of a high school equivalency test such as the General Educational Development (GED) test, or obtaining an Adult Basic Education (ABE) certificate where it is equivalent to the completion of secondary school.

U

Unemployed refers to persons who, during the week of Sunday, May 1 to Saturday, May 7, 2016, were without paid work or without self-employment work and were available for work and either

- Had actively looked for paid work in the past four weeks; or
- Were on temporary lay-off and expected to return to their job; or
- Had definite arrangements to start a new job in four weeks or less.

Unemployment rate refers to the unemployed expressed as a percentage of the labour force in the week of Sunday, May 1 to Saturday, May 7, 2016. The unemployment rate for a particular group (age, sex, marital status, geographic area, etc.) is the unemployed in that group, expressed as a percentage of the labour force in that group.

V

Visible minority refers to whether a person belongs to a visible minority group as defined by the *Employment Equity Act* and, if so, the visible minority group to which the person belongs. The *Employment Equity Act* defines visible minorities as "persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour". The visible minority population consists mainly of the following groups: South Asian, Chinese, Black, Filipino, Latin American, Arab, Southeast Asian, West Asian, Korean and Japanese.

Notes:

1. **Immigrant status** refers to whether the person is a non-immigrant, an immigrant or a non-permanent resident.
 2. **Immigrants** includes persons who are, or who have ever been, landed immigrants or permanent residents. Such persons have been granted the right to live in Canada permanently by immigration authorities. Immigrants who have obtained Canadian citizenship by naturalization are included in this category.
 3. **Recent immigrant** refers to an immigrant who first obtained his or her landed immigrant or permanent resident status between January 1, 2011 and May 10, 2016.
 4. **Non-permanent residents** includes persons from another country who have a work or study permit or who are refugee claimants, and their family members sharing the same permit and living in Canada with them.

Notes:

1. **Admission category** refers to the name of the immigration program or group of programs under which an immigrant has been granted for the first time the right to live in Canada permanently by immigration authorities. In the 2016 Census of Population, data on admission category and applicant type are available for immigrants who landed in Canada between January 1, 1980 and May 10, 2016.
2. **Economic immigrants** includes immigrants who have been selected for their ability to contribute to Canada's economy through their ability to meet labour market needs, to own and manage or to build a business, to make a substantial investment, to create their own employment or to meet specific provincial or territorial labour market needs.
3. **Immigrants sponsored by family** includes immigrants who were sponsored by a Canadian citizen or permanent resident and were granted permanent resident status on the basis of their relationship either as the spouse, partner, parent, grand-parent, child or other relative of this sponsor.
4. **Refugees** includes immigrants who were granted permanent resident status on the basis of a well-founded fear of returning to their home country.
5. **Other immigrants** includes immigrants who were granted permanent resident status under a program that does not fall under the economic immigrants, the immigrants sponsored by family or the refugee categories.

Note:

1. **Visible minority** refers to whether a person belongs to a visible minority group as defined by the *Employment Equity Act* and, if so, the visible minority group to which the person belongs. The *Employment Equity Act* defines visible minorities as "persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour." The visible minority population consists mainly of the following groups: South Asian, Chinese, Black, Filipino, Latin American, Arab, Southeast Asian, West Asian, Korean and Japanese.

Notes:

1. This is a total population estimate. The sum of the ethnic groups in this table is greater than the total population estimate because a person may report more than one ethnic origin in the Census. A person may have reported a single ethnic origin or multiple ethnic origins. In the 2016 Census, up to six ethnic origins by person were retained.
 2. **'Ethnic origin'** refers to the ethnic or cultural origins of the person's ancestors. An ancestor is usually more distant than a grandparent.

Notes:

1. **Generation status** refers to whether or not the person or the person's parents were born in Canada.
2. **First generation** includes persons who were born outside Canada. For the most part, these are people who are now, or once were, immigrants to Canada.
3. **Second generation** includes persons who were born in Canada and had at least one parent born outside Canada. For the most part, these are the children of immigrants.
4. **Third generation or more** includes persons who were born in Canada with both parents born in Canada.

Notes:

1. **Location of study** refers to the location of the institution granting the certificate, diploma or degree, not the location of the person at the time he or she obtained the qualification or was attending the institution.
2. It only applies to individuals who had completed a postsecondary certificate, diploma or degree. **'Postsecondary certificate, diploma or degree'** includes 'apprenticeship or trades certificate or diploma,' 'college, CEGEP or other non-university certificate or diploma' and university certificates, diplomas and degrees.

Notes:

1. **Work activity during the reference year** refers to the number of weeks in which a person aged 15 years and over worked for pay or in self-employment in 2015 at all jobs held, even if only for a few hours, and whether these weeks were mostly full time (30 hours or more per week) or mostly part time (less than 30 hours per week).
2. **Worked full year, full time** includes persons aged 15 years and over who worked full year (49 weeks and over) and mostly full time (30 hours or more per week) in 2015.
3. **Worked part year and/or part time** includes persons aged 15 years and over who worked full year mostly part time or part year mostly full time or part year mostly part time in 2015. Part year is less than 49 weeks and part time is less than 30 hours per week.
4. **Did not work** includes persons aged 15 years and over who never worked, persons who worked prior to 2015 and persons who worked in 2016, but not in 2015.

Notes:

1. For the 2016 Census, the reference period is the calendar year 2015 for all income variables.
2. In the context of persons, **total income** refers to receipts from certain sources, before income taxes and deductions, during a specified reference period.
3. **Median income** - The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median.
4. **After-tax income** - Total income less income taxes of the statistical unit during a specified reference period.

Income Highlight Tables, 2016 Census. Statistics Canada Catalogue no. 98-402-X2016006.

Notes:

1. **Low-income status** - The income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income.
 2. **Low-income measure, after tax (LIM-AT)** - The Low-income measure, after tax, refers to a fixed percentage (50%) of median-adjusted after-tax income of private households.
 3. For the 2016 Census, the reference period is the calendar year 2015 for all income variables.
 4. **Prevalence of low income** - The proportion or percentage of units whose income falls below a specified low-income line.
