PIF#: P379-0379-2021

Version: Original

## EXECUTIVE SUMMARY

Irvin Heritage Inc. was contracted by the proponent to conduct a Stage 1 and 2 Archaeological Assessment in support of a development application for a Study Area which is approximately 6.56 Ha in size.

The Stage 1 Archaeological Assessment indicated that the Study Area retained archaeological potential. As such, a Stage 2 Archaeological Assessment consisting of both a 5 m Pedestrian Survey and 5 m Test Pit Survey was conducted. The Stage 2 identified one Euro-Canadian archaeological site, registered as the North Guthrie Site BcGv-61.

The site consisted of a very dense surface scatter of 979 artifacts, which were dated to a period ranging from 1838 well into the 20th century. Out of the recovered artifact assemblage, only 181 artifacts could be specifically dated to the 19th century. This data, along with archival research indicates that the site represents a continual occupation from as early as 1838 until at least 1928. Given this data, and the fact that there would be no recommendation for Stage 4 Mitigation, no further assessment is recommended as the site is of overall low Cultural Heritage Value or Interest.

Given the results and conclusions of the completed Stage 1 & 2 assessment, the following recommendations are made:

- The Euro-Canadian, North Guthrie Site BcGv-61, does not warrant further archaeological investigation and has been sufficiently assessed within the completed assessment as having no further Cultural Heritage Value or Interest.
- It is the professional opinion of the archaeological licensee, Thomas Irvin (P379) that the Study Area has been sufficiently assessed and is free of further archaeological concern.
- Notwithstanding the above recommendations, the provided Advice On Compliance With Legislation shall take precedent over any recommendations of this report should deeply buried archaeological resources or human remains be found during any future earthworks within the Study Area. It is the professional opinion of the archaeological licensee, Thomas Irvin (P379) that the Study Area has been sufficiently assessed and is free of further archaeological concern.

## 1. ASSESSMENT CONTEXT

### 1.1. Development Context

Irvin Heritage Inc. was retained by the proponent to conduct a Stage 1 and 2 Archaeological Assessment of their property (the Study Area) located at the east half of Lot 20, Concession 5, Oro-Medonte, part of Lot 20, Concession 5, Township of Oro-Medonte, County of Simcoe, Historic Township of Oro in the Historic County of Simcoe (Map 1).

The requirement for a Stage 1 Archaeological Assessment was triggered by the Approval Authority in response to a Development Application under the Planning Act for the construction of residential units. The assessment reported on herein was undertaken after direction by the Approval Authority and before formal application submission.

The archaeological assessment reported on was undertaken for the entirety of the legal 6.55 Ha property. Permission, without limitation, was provided by the proponent to survey, assess, and document the archaeological potential and resources, if present, of the Study Area.

### 1.2. Environmental Setting

The Study Area is roughly rectangular, approximately 6.55 Ha in size, is predominantly active agricultural lands, with a small woodlot to its eastern extent (Maps 2 & 3). The Study Area is bordered on the East by 5 Line North, agricultural lands to the North and West, and Melville Court and residential lands to the South.

The majority of the Study Area is located within the Lake Simcoe Watershed and lies 4.8 km north of Lake Simcoe.

The Study Area is situated within the Simcoe Uplands (36) physiographic region of Southern Ontario.

## 2. HISTORICAL CONTEXT

### 2.1. General History

The Study Area is located within the boundaries of Treaty 16, otherwise known as the Simcoe Lake Purchase (MIA 2021). The treaty was signed on November 17th, 1815 by a representative of the crown and 3 chiefs of the Chippewa Nation (MIA 2021). This treaty granted ownership of

the lands north along the shores of Lake Simcoe from Barrie to Orillia, extending up to Midland. Portions of The South Shores of Georgian Bay to the East of Midland in Nottawasaga Bay were included as well. The treaty totalled 1000 square km and encompassed the majority of the Penetanguishene Road, now Highway 93, which was used as a major route for European settlers travelling north from Lake Simcoe (MIA 2021).

Following the end of the war of 1812, black veterans were given land north of Lake Simcoe in what would be known as Oro Township as of 1820 (Hill 1992). The name Oro was derived from the Spanish word for gold and as a nod to a river and settlement in Africa, Rio Del Oro (Rayburn 1997). By 1830, more surrounding land was surveyed and slated for settlement by British Isle immigrants. Craighurst became a larger settlement area for Europeans while Shanty Bay emerged toward the middle of the 1800s, influenced largely by black settlers (Hill 1992). Settlement was slow due to little access to mills, unfavourably cold climate, and no rail access until 1870 (Mika 1983). In 1994 the township of Oro was merged with the neighbouring township of Medonte during the restructuring of Simcoe County in the 1990s.

## 2.2. Study Area History

A review of historical resources resulted in the following data relevant to the Study Area:

### **Map 4: 1871 Hogg's Map of the County of Simcoe (Hogg 1871)**

The Study Area is situated within part of Lot 20, Concession 5. The land containing the Study Area is listed as under the ownership of M. Cameron. There are no structures noted within or adjacent to the Study Area.

### **Map 5: 1881 Historic Atlas of the County of Simcoe (Belden 1881)**

The Study Area is situated within part of Lot 20, Concession 5. The land containing the Study Area is listed as under the tenancy of D. Cameron. There are no structures noted within or adjacent to the Study Area.

### **Map 6: 1928 NTS Map County of Simcoe (Belden 1881)**

The Study Area is situated within part of Lot 20, Concession 5. The land containing the Study Area depicts two structures, one square and one rectangular. These are generally understood to represent a residence and barn.

The following should be noted in regard to the review of historic maps:

- Study Area placement within historic maps is only approximate
- Many historic maps were subscriber based, meaning only individuals who paid a fee would have their property details mapped

### 3. ARCHAEOLOGICAL CONTEXT

The Study Area is situated within an overall historic landscape that would have been appropriate for both resource procurement and habitation by both Indigenous and Euro-Canadian peoples.

#### 3.1. Registered Archaeological Sites

A search of the Ontario Sites Database conducted on April 30, 2021, using a Study Area centroid of 17T E 613719 N 4924690 indicated that there are no registered archaeological sites within a 1 km radius of the Study Area.

#### 3.2. Related and/or Adjacent Archaeological Assessments

No readily identifiable archaeological assessments have been conducted within or directly adjacent to the Study Area.

#### 3.3. Cemeteries & Burials

As per a cursory search conducted on April 30, 2021, there are no known or registered cemeteries or burials within or adjacent to the Study Area.

#### 3.4. Archaeological Management Plan

The Study Area is situated within the limits of the Simcoe Region Archaeological Management Plan which indicated that the Study Area retains archaeological potential.

#### 3.5. Heritage Conservation District

The Study Area is not situated within an existing or proposed Heritage Conservation District.

#### 3.6. Heritage Properties

The Study Area contains no registered or listed heritage properties.

### 3.7. Historic Plaques

There are no historic plaques within a 100 m radius of the Study Area (Ontario Heritage Trust 2021).

## 4. STAGE 1 ANALYSIS & CONCLUSIONS

It is clear that the Study Area retains archaeological potential owing to the environmental setting of the Study Area in relation historic settlement and proximity to a watercourse.

As such, the Study Area retains archaeological potential and should be subject to a Stage 2 Archaeological Assessment (Map 7).

## 5. STAGE 1 RECOMMENDATIONS

Given the analysis and conclusion of the completed Stage 1 assessment, the following recommendations are made:

- Lands which can be subject to agricultural ploughing must be prepared via ploughing to ensure a minimum 80% of soil visibility. Prepared lands must be allowed to weather under a significant rainfall event, or several lighter rains. A visual survey must be undertaken along 5 m survey intervals.
- Lands which are not viable to plough must be subject to a test pit survey with the following conditions:
  - ▶ All test pits are to be excavated by hand at 5 m intervals along 5 m transects
  - ▶ Test pits must be excavated to within 1 m of all extant and/or ruined structures when present
  - ▶ All test pits must be 30 cm in diameter and be excavated into the first 5 cm of subsoil
  - ▶ All test pits must be examined for evidence of fill, stratigraphy or cultural features
  - ▶ All excavated soils must be screened through 6 mm wire mesh to facilitate artifact recovery
  - ▶ All artifacts recovered must be retained via their associated test pit
  - ▶ All test pits are to be backfilled unless instructed otherwise by the landowner

## 6. STAGE 2 FIELD METHODOLOGY

Prior to the initiation of fieldwork, the Field Director reviewed the existing Stage 1 archaeological analysis and recommendations; all field staff were then briefed on the archaeological potential

## Stage 1 & 2 Archaeological Assessment

of the Study Area. Fieldwork was conducted in September 2021 (see Table 2). The weather consisted of light cloud cover or sunny conditions, but at all times the assessment was conducted under appropriate weather conditions.

TABLE 1: DATES & DIRECTORS OF ASSESSMENT

| Date         | Weather                 | Field Director(s) | Assistant Field Director(s) |
|--------------|-------------------------|-------------------|-----------------------------|
| Sept 28 2021 | 25°C, light cloud cover | T. Irvin (P379)   | S. Samuel                   |

The assessment began with a visual review of the Study Area conditions.

The Study Area was found to consist of predominantly well ploughed and weathered agricultural fields which were subject to a 5 m Pedestrian Survey (Images 1 and 2). The woodlot forming the eastern limit of the Study Area, along with a narrow band of scrubland along the southern limit were subject to a 5 m Test Pit Survey. The Test Pit Survey found examples of both disturbed and undisturbed soils, however, the disturbed soils were not concentrated in any specific area and as such did not alter the survey transects nor methodology. The topsoil consisted of a mixture of sand and loam atop a yellow-orange subsoil.

During the Pedestrian Survey one Euro-Canadian archaeological site was identified. The site was subject to a Stage 3 equivalent 1 m transect CSP (Images 5-7). All artifacts were collected via their GPS waypoint. All GPS waypoints were collected using a EMLID Reach RS rover and base station system with an accuracy set to 12 cm.

The archaeological methodology employed during the Stage 2 Test Pit survey consisted of:

- All test pits were excavated by shovel at 5 m intervals on 5 m transects (unless noted above)
- Test pits were excavated to within 1 m of all structures, both extant and in ruin, when present
- All test pits were 30 cm in diameter and were excavated into the first 5 cm of subsoil
- All test pits must be examined for evidence of fill, stratigraphy or cultural features
- All excavated soils which were of an undisturbed context were screened through 6 mm wire mesh
- All test pits were backfilled

The archaeological survey of the property resulted in the discovery of one Euro-Canadian archaeological site; registered as the North Guthrie Site BcGv-61.

7. STAGE 2 RECORD OF FINDS

The Stage 2 CSP conducted on the North Guthrie Site yielded a total of 979 artifacts from 262 individual findspots.

**TABLE 2: NORTH GUTHRIE SITE STAGE 2 PRODUCTIVITY**

| Coin                            | 1        |

The recovered artifact assemblage was dominated by Tablewares, of which Whiteware (n=346) and Ironstone were the most prevalent (n=266). There was a noted lack of any earlier ceramics such as Creamware or Pearlwares; while Porcelain was recovered (n=17), examples of 20th century decal transfer porcelain was present suggesting the porcelains are of later and not earlier production periods. The Architectural class included various types of nails, such as Wrought (n=6), Wire (n=9), Framing (N=2) and Machine Cut (n=79).

The general nature of the assemblage, consisted of very few artifacts which have a production range confined to the 19th century (n=181, or 18% of the recovered assemblage). The balance of the assemblage consisted of artifacts with a broad period of both production and use which spans both the 19th and 20th centuries. Given the nature of the assemblage, the site represents consistent rural domestic occupation dating from approximately 1838 well into the 20th century.

The completed archaeological assessment resulted in the creation of various documentary records (Table 4).

| Artifacts: 12" x 5" x 10"   | Box           | 1          |

## 8. ARCHIVAL RESEARCH

In order to understand where the North Guthrie site fits within the overall historical context of the Study Area, Stage 3 equivalent archival research was undertaken. It should be noted that the Study Area is a very small, clearly severed portion of the overall lot. To account for this, the conducted land transaction history focused on the eastern limits of Lot 20, Concession 5.

**TABLE 5: LOT 20, CONCESSION 5 LAND TRANSACTION HISTORY**

In summary, the eastern portion of the Lot appears to have the following ownership history:

- 1829 - James Roach
- 1829 - Robert W. Prentice
- 1832 - Edward O'Brien
- 1834 - Lucias J. O'Brien
- 1849 - Charles & John Cameron
- 1860 - John Wesley Marrow
- 1861 - John Sheridan
- 1862 - David Marrow
- 1875 - Henry R. A. Boy
- 1881 - Thomas Day
- 1889 - Walter P. Chapman
- 1890 - Thomas Kearney

A review of the available census data was also conducted.

**TABLE 6: 1861 HISTORIC CENSUS DATA**

| Name              | Date of Record | Age | Sex | Marriage | Birth    | Occupation | Dwellings      |
|-------------------|----------------|-----|-----|----------|----------|------------|----------------|
| John Sheridan     | 1861           | 30  | M   |          | Ireland  | Farmer     | 2 Storey Frame |
| [Amanda] Sheridan |                | 31  | F   |          | New York |            |                |

Stage 1 & 2 Archaeological Assessment

| Name             | Date of Record | Age | Sex | Marriage | Birth    | Occupation | Dwellings |
|------------------|----------------|-----|-----|----------|----------|------------|-----------|
| Charles Sheridan |                | 5   | M   |          | New York |            |           |
| [??] Sheridan    |                | 3   | M   |          | New York |            |           |

Line 23, within the 1861 census indicated that John Sheridan was occupying the eastern limit of the Study Area (roughly 150 acres) (1861 Agricultural Census).

**TABLE 7: 1871 HISTORIC CENSUS DATA**

| Name          | Date of Record | Age | Sex | Marriage | Birth    | Occupation | Dwellings |

**TABLE 8: 1911 HISTORIC CENSUS DATA**

| Name           | Date of Record | Age | Sex | Marriage | Birth   | Occupation | Dwellings |
|----------------|----------------|-----|-----|----------|---------|------------|-----------|
| Thomas Kearney | 1911           | 46  | M   | —        | Ontario | Farmer     |           |

In summary, the historic land transfer history and the available census data, John Sheridan is present in 1861 until he sold to David Morrow who then lived on the land until 1875 as evidenced in the agricultural census. During this time it is likely that Morrow tenanted part of the land to the Cameron family headed by Neil Cameron and then Malcolm Cameron as indicated in the Belden map of 1881. However the Cameron family has many farms in the area and it is difficult to definitely place them on this lot after Malcolm Cameron disappears from the Census. The ownership changed from Morrow to Boys and then to Thomas Day in 1881. However, there is no way to prove Day did or did not live on the land at this time. He sold to Walter Chapman in 1889 but again there is no evidence of habitation as he sold the land to Thomas Kearney in 1890 before a census could be taken. Thomas Kearney lived alone and farmed the land into the 20th century as evidenced by his recorded occupation there in the 1911 census.

Given the above, the North Guthrie site is a rural domestic occupation spanning such a large time frame that it can be attributed to no single occupant.

## 9. STAGE 2 ANALYSIS & CONCLUSIONS

The Study Area, measuring approximately 6.56 Ha in size was subject to a complete archaeological assessment. The Study Area was found to consist of agricultural lands and woodlot/scrubland. One Euro-Canadian archaeological site was identified during the pedestrian survey and registered as the North Guthrie Site BcGv-61. A review of the recovered artifact assemblage indicated site which represents a rural domestic occupation dating to approximately 1838 well into the 20th century. While no structures are depicted on the 19th century mapping reviewed for this report, the 1928 NTS map places a structure (likely a homestead) exactly at the location of the North Guthrie Site (Map 11). As no trace of this 1928 structure is present, it is clear that this, and any associated structures were razed and the Study Area converted to agricultural lands; this would have had extensive and negative impacts to any archaeological deposits.

The large Stage 2 artifact assemblage provided for a very large site assemblage sample to be obtained. Given the timespan of site deposition/occupation as evidence by the recovered artifact assemblage, coupled with the completed archival research, indicates that the North Guthrie Site has an extensive timespan of occupation from approximately 1838 to, at least, 1928. Given this, the site does not have a time span of occupation of which more than 80% predates 1870. As it is clear that no recommendation for a Stage 4 mitigation of impacts would

## Stage 1 & 2 Archaeological Assessment

be made, and that the site is of limit Cultural Heritage Value or Interest in regard to 19th century life-ways, the site is of overall low Cultural Heritage Value or Interest. Further to the above, the 20th century demolition of the noted 1928 structures, and conversion of the site area back into agricultural lands would have likely had a negative impact to any archaeological deposits.

In summary, given the date range of the artifact assemblage, coupled with the land use history of the property, the North Guthrie Site (BcGv-61) consists of a mid 19th century to early to mid 20th century occupation of the property. As such, the site does not possess any indicators of further Cultural Heritage Value or Interest. Further archaeological investigation of this site would not place the site within a more meaningful historical or archaeological context.

**TABLE 9: SUMMARY OF STAGE 2 ASSESSMENT METHODOLOGIES & FINDINGS**

| <b>Assessment Method</b>                        | <b>Findings</b>  | <b>Ha</b>   | <b>% of Study Area</b> |
|---|------------------|-------------|------------------------|
| Archaeological Potential: 5 m Pedestrian Survey | 1x Euro-Cdn Site | 5.5         | 83.8%                  |
| Archaeological Potential: 5m Test Pit Survey    | No Resources     | 1.06        | 16.2%                  |
| <b>Total</b>                                    |                  | <b>6.56</b> | <b>100</b>             |

| Centre          | 17T 613704 4924635 |

## 10. STAGE 2 RECOMMENDATIONS

Given the results and conclusions of the completed Stage 1 & 2 assessment, the following recommendations are made:

- The Euro-Canadian, North Guthrie Site BcGv-61, does not warrant further archaeological investigation and has been sufficiently assessed within the completed assessment as having no further Cultural Heritage Value or Interest.

### Stage 1 & 2 Archaeological Assessment

- It is the professional opinion of the archaeological licensee, Thomas Irvin (P379) that the Study Area has been sufficiently assessed and is free of further archaeological concern.
- Notwithstanding the above recommendations, the provided Advice On Compliance With Legislation shall take precedent over any recommendations of this report should deeply buried archaeological resources or human remains be found during any future earthworks within the Study Area.

## 11. ADVICE ON COMPLIANCE WITH LEGISLATION

The Standards and Guidelines for Consultant Archaeologists requires that the following standard statements be provided within all archaeological reports for the benefit of the proponent and approval authority in the land use planning and development process (MTC 2011:126):

This report is submitted to the Minister of Tourism, Culture and Sport as a condition of licensing in accordance with Part VI of the Ontario Heritage Act, R.S.O. 1990, c 0.18. The report is reviewed to ensure that it complies with the standards and guidelines that are issued by the Minister, and that the archaeological fieldwork and report recommendations ensure the conservation, protection and preservation of the cultural heritage of Ontario. When all matters relating to archaeological sites within the project area of a development proposal have been addressed to the satisfaction of the MTCS, a letter will be issued by the ministry stating that there are no further concerns with regard to alterations to archaeological sites by the proposed development.

It is an offence under Sections 48 and 69 of the Ontario Heritage Act for any party other than a licensed archaeologist to make any alteration to a known archaeological site or to remove any artifact or other physical evidence of past human use or activity from the site, until such time as a licensed archaeologist has completed archaeological fieldwork on the site, submitted a report to the Minister stating that the site has no further cultural heritage value or interest, and the report has been filed in the Ontario Public Register of Archaeology Reports referred to in Section 65.1 of the Ontario Heritage Act.

Should previously undocumented archaeological resources be discovered, they may be a new archaeological site and therefore subject to Section 48 (1) of the Ontario Heritage Act. The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed consultant archaeologist to carry out archaeological fieldwork, in compliance with Section 48 (1) of the Ontario Heritage Act.

Archaeological sites recommended for further archaeological fieldwork or protection remain subject to Section 48 (1) of the Ontario Heritage Act and may not be altered, or have artifacts removed from them, except by a person holding an archaeological licence.

The Funeral, Burial and Cremation Services Act, 2002, S.O. 2002, c.33 requires that any person discovering human remains must notify the police or coroner and the Registrar of Cemeteries at the Ministry of Consumer Service.
