

2020

Social and Community Investment Fund

BULLETIN

The County of Simcoe provides a Social and Community Investment Fund (SCIF) to help local organizations develop community-based initiatives that address poverty.

SCIF is intended to provide opportunities for low-income families through community programs. The goals of the SCIF program are:

1. to support programs in the community that address services for low-income families, particularly those in receipt of social assistance, and
2. to address pressures identified in the social service sector.

It is recognized that a continuum of supports is an ideal approach for a combination of interventions and preventative measures when addressing poverty.

The amount of funding available may change from year to year.

An allocations committee is used to help review and make project funding recommendations for County Council consideration.

SCIF Program Guidelines are based on the following eligibility criteria:

- Innovative projects that focus on prevention and community partnerships and collaborations to deliver programs and services for residents living on low-income in Simcoe County
- Inclusive service strategies to help break down the cycle of poverty for children, youth, adults and families
- Strength-based approach to interventions and other community development approaches
- Opportunities to enhance a culture of health and well-being
- Partnerships through data and program evaluation that demonstrates collective impact and sustainability
