- Mandarin
- Urdu
- Polish.

Background

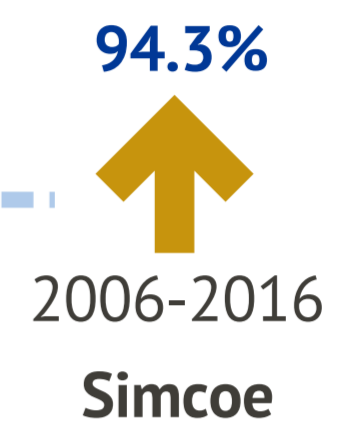

Aboriginal

First and Second Generation

Population Change

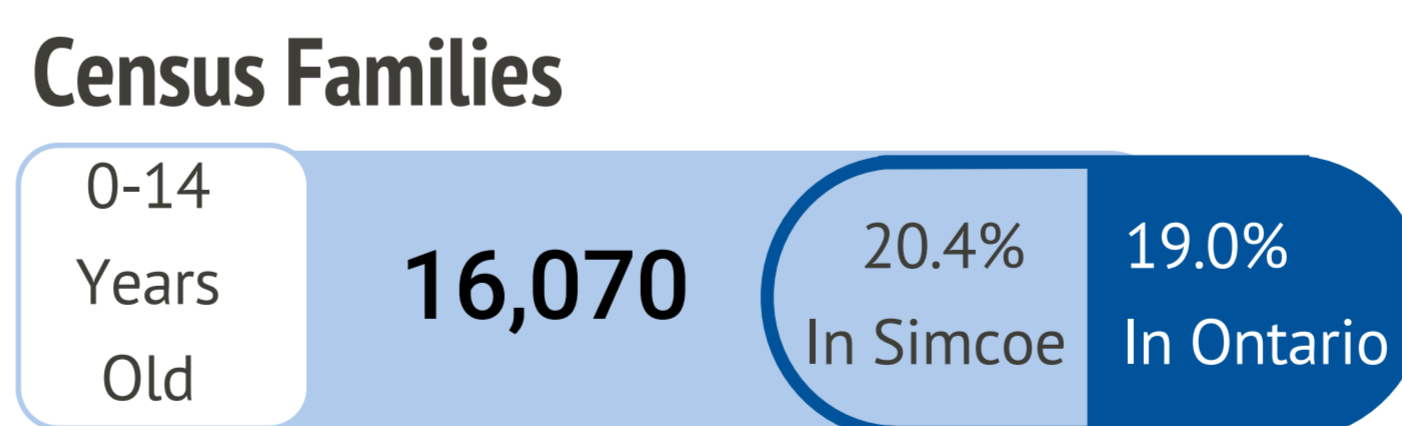

Low Income (LIM-AT)

Children Living in Low Income

Census Family

Children Living in Lone Parent Census Families

Children Living with Grandparents

*The percentage data are calculated out of the total 0 to 6 year old population. If data is being displayed for a different age group, then the percentage data is also calculated using that different age group total.

*Data represents information from the 2016 Census, unless otherwise specified. Data is shown for children, aged 0 to 6 years, except for when the data was not available for that age group.

*'Low income measure after tax (LIM-AT)' refers to a fixed percentage (50%) of median-adjusted after-tax income of private households. The household after-tax income is adjusted by an equivalence scale to take economies of scale into account. This adjustment for different household sizes reflects the fact that a household's needs increase, but at a decreasing rate, as the number of members increases.

*'First generation' includes persons who were born outside Canada. For the most part, these are people who now, or once were, immigrants to Canada.

*'Second generation' includes persons who were born in Canada and had at least one parent born outside Canada. For the most part, these are the children of immigrants.

*For the 2016 Francophone data, used in this profile, and obtained from the Community Data Program's Target Group Profile, the following are individuals that are included: individuals with French as their first official language spoken, French as their mother tongue and or French as the language spoken most often at home. For a complete detailed list of individuals included, please look at the Community Data Program website.

*For 'Children Living with Grandparents' data, children are living with one or two grandparents without parents present.
